| Or Slade, Carbonising or Distilling. (P) Young. (vi, 1887).....                                                                                             | 815  |
| Origin and Distribution of Phosphorus in. (Carnot.) (iv, 1885).....                                                                                         | 108  |
| Persian. (Stahl.) (xiii, 1894).....                                                                                                                         | 242  |
| Petroleum-like Bitumen of Japanese. (Smith and Chorley.) (xii, 1893).....                                                                                   | 221  |
| Phosphorus in, Determ. of. (Lynchenheim.) (xiii, 1894).....                                                                                                 | 422  |
| Preparing and Coking. (P) Rylands and Naylor. (xii, 1893).....                                                                                              | 135  |
| Preparing Explosives by Direct Nitration of. (P) Hellhoff. (i, 1882).....                                                                                   | 424  |
| Preventing Explosion of. (P) Lake. From Behnke and others. (xiv, 1895).....                                                                                 | 356  |
| Process and Apparatus for Treatment of. (P) Young and Beilby. (ii, 1883).....                                                                               | 373  |
| Production, Cost of, in Germany and France. (T.R.) (viii, 1889).....                                                                                        | 492  |
| Production in Japan. (T.R.)..... (viii, 1889), 657; (xii, 1893), 793                                                                                        |      |
| Production of Ammonia from Distillation of. (Tervet.) (ii, 1883).....                                                                                       | 445  |
| Production of, in France, in 1884. (iv, 1885).....                                                                                                          | 582  |
| Production of, in France, in 1889. (T.R.) (ix, 1890).....                                                                                                   | 339  |
| Production of, in Russia. (T.R.) (ix, 1890).....                                                                                                            | 829  |
| Production of, in the United States, in 1887. (T.R.) (vii, 1888).....                                                                                       | 532  |
| Products of, Incinerated with Steam and Air. (Beilby.) (iii, 1884).....                                                                                     | 222  |
| Properties of, with Relation to its Vegetable Origin. (Carnot.) (iv, 1885).....                                                                             | 108  |
| Proximate Constituent of. (Reinsch.) (iv, 1885).....                                                                                                        | 392  |
| Rapid Determination of Phosphorus in. (Crobaugh.) (xii, 1893).....                                                                                          | 1061 |
| Recovery of Volatile Combustion Products of. (Jameson.) (ii, 1883).....                                                                                     | 227  |
| Recovery of Volatile Constituents of. (Jameson.) (ii, 1883).....                                                                                            | 114  |
| Rendering Anthracite, dust useful as Fuel. (P) Williams. (viii, 1889).....                                                                                  | 272  |

|                                                                                                                |      |
|----------------------------------------------------------------------------------------------------------------|------|
| Resinous Constituents of. (Siepmann.) (x, 1891).....                                                           | 753  |
| Retorts for Distillation of:                                                                                   |      |
| (P) Jones.....(vi, 1887), 549; (viii, 1889), 697                                                               |      |
| (P) Yeaton and Adzie. (ix, 1890).....                                                                          | 797  |
| Retorts for Treating. (P) Hislop. (iv, 1885).....                                                              | 201  |
| Salt, &c., in the Don Territory. (T.R.) (vii, 1888).....                                                       | 781  |
| Separating and Washing Plant. (x, 1891).....                                                                   | 241  |
| Servian. (Losanitsch.) (vii, 1888).....                                                                        | 111  |
| Shale, Apparatus for Distillation of. (P) Rose. (vi, 1887)                                                     | 505  |
| Shale, Lignite, &c., Apparatus for Treatment of. (P)                                                           |      |
| Aitken. (iii, 1884).....                                                                                       | 438  |
| Spontaneous Ignition of:                                                                                       |      |
| (Durand.) (ii, 1883).....                                                                                      | 325  |
| (Lewes.) (ix, 1890).....                                                                                       | 483  |
| Sulphur in:                                                                                                    |      |
| (Helm.) (i, 1882).....                                                                                         | 219  |
| (Muck.) (v, 1886).....                                                                                         | 521  |
| Sulphur in, Determination of:                                                                                  |      |
| (Brulle.) (viii, 1889).....                                                                                    | 219  |
| (Rothe.) (x, 1891).....                                                                                        | 952  |
| (Stolha.) (vii, 1888).....                                                                                     | 524  |
| Sulphur in, Estim. and Occurrence of. (Bailey.) (viii, 1889)                                                   | 360  |
| Sulphur in, Estimation of:                                                                                     |      |
| (Atkinson.) (v, 1886).....                                                                                     | 154  |
| (Gritner.) (xi, 1892).....                                                                                     | 711  |
| (Hempel.) (xii, 1893).....                                                                                     | 181  |
| Temperature employed in Distillation of. (Wright.) (xiv, 1895).....                                            | 642  |
| The Future of. (Reynolds.) (xi, 1892).....                                                                     | 571  |
| Trade of Belgium, Depression in. (T.R.) (vi, 1887).....                                                        | 463  |
| Trade, Statistics of the. (T.R.) (vi, 1887).....                                                               | 55   |
| Treatment of Duff, Pit Waste, Shale, &c. (P) Jameson. 1883).....                                               | 345  |
| Treatment of Products of Combustion of. (P) Darby. (iii, 1884).....                                            | 163  |
| Under London, Is there? (Judd.) (i, 1882).....                                                                 | 58   |
| Use of, in Manufacture of Blacking, Japan, &c. (P) Donovan and McKenny. (vii, 1888).....                       | 127  |
| Utilisation of Gases from Carbonisation of. (P) Dunlop. (xiv, 1895).....                                       | 261  |
| Valuation of. (Bunte.) (x, 1891).....                                                                          | 350  |
| Volatile Hydrocarbons from. (P) Drew. (iii, 1884).....                                                         | 475  |
| Weathering of. (Busse.) (ix, 1890).....                                                                        | 924  |
| Westphalian Cannel and Pseudo-Cannel. (Muck.) (vii, 1888).....                                                 | 556  |
| Coals, Analysis of Samples of Furnace. (Jones.) (iv, 1885)...                                                  | 738  |
| Apparatus for Sorting and Washing. (P) Jouffrey and Chevalier. (i, 1882).....                                  | 411  |
| Appliance for Washing. (P) Baugert. (ii, 1883).....                                                            | 165  |
| Caloric Value of. (Deutecom.) (xi, 1892).....                                                                  | 897  |
| Constituents of. (Smith and Chorley.) (xi, 1892).....                                                          | 591  |
| For Making Coke, Investigation of. (Pennoek.) (xii, 1893).....                                                 | 586  |
| Gas Generator for Rich. (Ferariz.) (vii, 1888).....                                                            | 203  |
| Immersed in Water, Experiments on. (Arth.) (xiii, 1894)                                                        | 1182 |
| Nitrogen in Various, and Production of Ammonia therefrom. (Schilling.) (vi, 1887).....                         | 652  |
| Report on Indian. (xiv, 1895).....                                                                             | 470  |
| Testing the Relative Value of. (Kent.) (ix, 1890).....                                                         | 850  |
| Valuation of. (Horn.) (xii, 1893).....                                                                         | 20   |
| Variations in Products of Distillation of Gass. (Smith.) (viii, 1889).....                                     | 949  |
| Coal-juice. See Sugar-cane Juice.                                                                              |      |

| Alizarin-Green Derivatives, Production of. (P) Johnson. From The Badische Anilin und Soda Fabrik. (viii, 1889)                                            | 772      |
| Alizarin, Manufacture of Dry. (P) Imray. From The Farbwerke vormals Meister, Lucius und Brüning. (xiv, 1895)                                              | 265      |
| Alizarin, Preparation of. (P) Gedge. From Jagenburg and Leverkus. (iv, 1885)                                                                              | 280      |
| Alizarin, Preparation of Artificial. (P) Farbwerke vormals Meister, Lucius und Brüning. (i, 1882)                                                         | 226      |
| Alizarin, Production of New Derivatives of. (P) Wilcox. From The Farbenfabriken vormals F. Bayer and Co. (x, 1891)                                        | 759      |
| Alizarin, Purification of. (P) Brönnner. (ii, 1882), 499; (ii, 1883), 274                                                                                 | 410      |
| Alizarin, Recovery of, from Residues. (ii, 1883)                                                                                                          | 171      |
| Alizarin, Synthetical Production of, from Hemipic Acid. (Lagodzinski.) (xiv, 1895)                                                                        | 860      |
| Alizarin Yellows, Application of. (Werner.) (xi, 1892)                                                                                                    | 599      |
| Alkannin. (Liebermann and Römer.) (vi, 1887)                                                                                                              | 723      |
| Alkyl-Ethers, Manufacture of Acetyl from. (P) Johnson. From Boehringer and Sons. (xiv, 1895)                                                              | 861      |
| Alkyl Hydroxy-Derivatives of Dimethylaniline. (Grimaux.) (x, 1891)                                                                                        | 458      |
| Allocinnamic Acid, Formation of. (Liebermann and Sehnolz.) (xi, 1892)                                                                                     | 677      |
| Amethylammonitroketone. (Cazeneuve.) (xi, 1892)                                                                                                           | 900, 900 |
| Amethylamphophenolsulphone and its Tetra-nitro Derivative. (Cazeneuve.) (ix, 1890)                                                                        | 853      |
| Amido- and Nitro-Phenols, Preparation of. (P) Deninger. (viii, 1889)                                                                                      | 538      |
| Amido Compounds, Conversion of Aromatic. (Sandmeyer.) (vi, 1887)                                                                                          | 593      |
| Amido Group, Substitution of, by Chlorine, Bromine, and Cyanogen in Aromatic Compounds. (Sandmeyer.) (iv, 1886)                                           | 204      |
| Amido-Alizarin, Preparation of. (Lauth.) (xi, 1892)                                                                                                       | 236      |
| Amidoanthraquinone. (Roemer.) (i, 1882)                                                                                                                   | 400      |
| Amido-Azo-Derivatives of the Three Xylenes. (Nolting and Forel.) (v, 1886)                                                                                | 27       |
| Amidoazophthalene, Reduction of. (Friedländer.) (ix, 1890)                                                                                                | 59       |
| Amidochrysene:                                                                                                                                            |          |
| (Abegg.) (ix, 1890)                                                                                                                                       | 600      |
| (Bamberger and Burzdorf.) (ix, 1890)                                                                                                                      | 605      |
| Amido-Cresol, Conversion of Toluylene-Diamine into a New. (Wallach.) (ii, 1883)                                                                           | 39       |
| Amidodiphenylsulphonic Acid from Diphenyl. (Carnelley and Schlesselman.) (v, 1886)                                                                        | 376      |
| Amido-Guanidine, Treatment of. (P) Johnson. From Badische Anilin und Soda Fabrik. (xii, 1893)                                                             | 142      |
| Amidonaphthalene-Disulphonic Acids, Yellow Dye from. (P) Mewburn. From Freund. (iii, 1884)                                                                | 166      |
| Amidonaphthalenesulphonic Acid, $\alpha$ - and $\beta$ -. (Clève.) (x, 1891)                                                                              | 1062     |
| Amidonaphthalenesulphonic Acid, $\delta$ - and $\gamma$ -. (Clève.) (viii, 1889)                                                                          | 116      |
| Amidonaphthalenetetrabenzene Sulphonic Acids, Preparation of. (P) Bayer and Co. (ii, 1883)                                                                | 172      |
| Amidonaphtholdisulphonic Acid, Manufacture of a New 1,8-. (P) Abel. From Fischesser and Co. (xiv, 1895)                                                   | 479      |
| Amidonaphtholdisulphonic Acid, Manufacture of. (P) Abel. From Actien Gesellschaft für Anilin Fabrikation. (xiii, 1894)                                    | 32       |
| Amidonaphtholsulphonic Acids, and Dyestuffs therefrom. (P) Pitt. From Cassella and Co. (xi, 1892)                                                         | 345      |
| Amidonaphthol Sulphonic Acids. (Reverdin and de la Harpe.) (xii, 1893)                                                                                    | 749      |
| Amido-para-Cresylmethyl Ether. (Limpach.) (viii, 1889)                                                                                                    | 452      |
| Amidophenol Sulphonic Acids. (Brunner and Kramer.) (iv, 1885)                                                                                             | 51       |
| Amidophenols, Manufacture of. (P) Lake. From Leonhardt and Co. (ix, 1890)                                                                                 | 608      |
| Amido-Triphenylmethanes, Preparation of. (Mühlhäuser.) (viii, 1889)                                                                                       | 455      |
| Amines, Action of Sulphur on Primary Aromatic. (Anschütz and Schultz.) (ix, 1890)                                                                         | 49       |
| Amines, Transformation of Primary, into Mononitrophenols. (Noelting and Wild.) (iv, 1885)                                                                 | 398      |
| Ammonia Derivatives, of Hexamethyltriamidodiphenylmethane. (Rosnstiehl.) (xiv, 1895)                                                                      | 474      |
| Ammonium Iodide Derivative of Hexamethyltriamidodiphenylmethane. (Rosnstiehl.) (xiv, 1895)                                                                | 359      |
| Ammonium Salts, Manuf. of. (Mühlhäuser.) (xi, 1892)                                                                                                       | 676      |
| Aniline, Action of Acetone upon. (Engler and Riehm.) (v, 1886)                                                                                            | 238      |
| Aniline, Action of, on Resorcinol and Quinol. (Calm.) (iii, 1884)                                                                                         | 164      |
| Aniline and Metallic Sulphites, New Compounds of. (Dengès.) (x, 1891)                                                                                     | 692      |
| Aniline and $\alpha$ - and $\beta$ -Toluidine, Chlorination and Bromination of. (Hafner.) (ix, 1890)                                                      | 52       |
| Aniline and Perchlormethylmercaptan, Compounds of. (Kathke.) (v, 1886)                                                                                    | 320      |
| Aniline and Toluidine, Apparatus for Production of. (P) Kendall. (ii, 1883)                                                                               | 275      |

COLOURING MATTERS AND DYES, VARIOUS—*cont.*

| (P) Durand and others. (xiv, 1895).....                                                                                                    | 651           |
| Blue-Green, Production of. (P) Imray. From The Farbwerke vormals Meister, Lucius, and Brünig. (x, 1891).....                               | 538           |

COLOURING MATTERS AND DYES, VARIOUS—*cont.*

PAGE

Colouring Matters—*cont.*

## Blue, Manufacture of:

- (P) Meldola. (i, 1882) ..... 419  
(P) Stebbins. (i, 1882) ..... 107, 147

## Blue Mordant Dyeing. (P) Johnson. From "The Badische Anilin und Soda Fabrik." (xii, 1893) 257, 258

## Blue Mordant Dyeing, Prod. of. (P) Johnson. From "The Badische Anilin und Soda Fabrik." (xii, 1893) ..... 921

## Blue Mordant, Production of. (P) Newton. From "Farbenfabriken vorm. Bayer und Co." (xiii, 1894) 383, 383

## Blue, Preparation of. (iii, 1884) ..... 515

## Blue, Production of:

- (P) Abel. From The Actiengesellschaft für Anilin Fabrikation. (viii, 1889) ..... 280

- (P) Dawson. (x, 1891) ..... 916  
(P) Durand and others. (x, 1891) ..... 359

- (P) Espenscheid. (iii, 1884) ..... 105  
(P) Haddan. From Lembach and Schleicher. (iii, 1884) ..... 243

- (P) Imray. From Farberwerke vormals Meister, Lucius, and Brüning. (xi, 1892) ..... 514, 514

- (P) Imray. From La Société L. Durand, Huguenin et Cie. (xi, 1892) ..... 237

- (P) Imray. From The Society of Chemical Industry in Basle ..... (ix, 1890), 610;  
(xiii, 1894), 31

- (P) Kern and Sandoz. (x, 1891) ..... 181  
(P) Lembach and Schleicher. (iii, 1884) ..... 28

- (P) Meldola. (ii, 1883) ..... 89  
(P) Mühlhauser. (iii, 1884) ..... 28

- (P) Pitt. From Cassella and Co. .... (viii, 1889), 280; (ix, 1890), 173

- (P) Thomas and Witt. (i, 1882) ..... 182  
(P) Wilcox. From The Farbenfabriken vormals Bayer und Co. (x, 1891) ..... 761

- (P) Wirth. From Oehler. (ii, 1882) ..... 243  
Blue Substantive, Prod. of. (P) Johnson. From "The Badische Anilin und Soda Fabrik." (x, 1891) ..... 249

- Blue Triphenylmethane, Production of. (P) Geigy and Sandmeyer. (xii, 1894) ..... 597

- Blue-Violet and Blue-Green, Production of. (P) Dinand and others. (xiv, 1895) ..... 477

- Blues from Rosaniline, Production of. (Noelting and Collin.) (iv, 1885) ..... 398

- Bluish-Black, Production of:  
(P) Pitt. From Cassella and Co. .... (viii, 1889), 980; (ix, 1890), 497

- (P) Schäd. (v, 1886) ..... 523  
Bluish-Red, Production of. (Limpach.) (ii, 1883) ..... 40

- Brominated Azo, Prod. of. (P) Société Anonyme des Matières Colorantes de St. Denis. (iv, 1885) ..... 50

- Brown. (P) Bayer and Co. (i, 1882) ..... 226, 226  
Brown and Orange, Production of. (P) Lake. From Oehler. (xii, 1893) ..... 674

- Brown Azo, Production of. (P) Actiengesellschaft für Anilin Fabrikation. (iii, 1884) ..... 28

- Brown Mordant, Production of. (P) Schweich and Bucher. (xi, 1892) ..... 515

- Brown, Production of:  
(P) Abel. From Actiengesellschaft für Anilin Fabrikation. (viii, 1889) ..... 533

- (P) Abel. From Farberwerke vormals Meister, Lucius, and Brüning. (iii, 1884) ..... 442

- (P) Ashworth and Burger. (xiii, 1891) ..... 723  
(P) Lake. From Oehler. (xii, 1890) ..... 699

- (P) Shillito. From Geigy and Co. (x, 1891) ..... 248  
By Means of Hydrogen Dioxide, Production of. (Wurster.) (vii, 1888) ..... 117

- Chrome-Yellow and Chrome-Red, Preparation of. (P) Spence. From Werner. (i, 1882) ..... 356

- Coal-Tar, New. (iii, 1884) ..... 27  
Composition of New. (Knecht.) (vii, 1888) ..... 560

- Condensation Products and, Production of. (P) Abel. From The Actiengesellschaft für Anilin Fabrikation. (xiv, 1895) ..... 801

- Constituent of Persian Berries. (Perkin and Geldard.) (xiv, 1895) ..... 565

- Contained in Chay-Root. (Perkin and Hummel.) (xiv, 1895) ..... 746

- Containing Sulphur, Apparatus for Manufacture of. (P) Majert. (iv, 1885) ..... 275

- Containing Sulphur, Production of. (P) Espenscheid. (i, 1882) ..... 225

- Containing Sulphur, Production of Blue. (P) Claus and Ree. (xiii, 1894) ..... 384

- Conversion of *m*-amidodialkyl-*o*-toluidine, into Methylene Blue. (Bernthsen.) (xii, 1893) ..... 139, 750

- Cotton Brown, Production of. (P) Lake. From Oehler. (xiv, 1895) ..... 1042

- Crystallised Methyl-violet. (Hofmann.) (iv, 1885) ..... 395

- Derivatives of Triphenylmethane. (Noelting.) (ix, 1890) ..... 279

- Derived from 2,7-amidonaphtholdisulpho Acid. (P) Abel. From Actiengesellschaft für Anilin Fabrikation. (xiii, 1894) ..... 876

- Derived from Dioxidylphenylmethane. (P) Durand, Huguenin, and d'Andiran. (xiii, 1894) ..... 145

- Derived from Tannins. (Witt.) (iv, 1885) ..... 672

- Detection of, on Fibre:  
(Brooke, Simpson, and Spiller.) (xiv, 1895) ..... 990

- (Lehne and Rusterholz.) (xiv, 1895) ..... 72, 73, 192, 306, 391, 517, 600, 680, 823, 891

- (Schoellkopf Aniline and Chem. Co.) (xiv, 1895) 1067  
(The Clayton Aniline Co.) (xiv, 1895) ..... 1095

- Detection of Red. (Groot.) (i, 1882) ..... 161  
Development of, in Textiles. (P) Hart. (ix, 1890) ..... 340

- Diazo, Manufacture of. (P) Lake. From Vignon and Co. (iii, 1884) ..... 442

- Diazo, Production of:  
(P) Abel. From The Actiengesellschaft für Anilin Fabrikation. (xii, 1893) ..... 350

- (P) Clark. From Krugener and Farb. vormals Brunner. (iv, 1885) ..... 400

- (P) Clayton Aniline Co. and Hall. (xi, 1892) ..... 679

- (P) Dreyfus. (xiii, 1891) ..... 1191

- (P) Newton. From Farbenfabriken vormals F. Bayer und Co. .... (xii, 1893), 1023; (xiii, 1894), 30

- (P) Thompson and Claus. (viii, 1889) ..... 538

- (P) Wilcox. From The Farbenfabriken vormals F. Bayer und Co. (xii, 1893) ..... 239

- Dinitro-Chlorotoluene in Synthesis of Azine. (Nietzki and Rehe.) (xii, 1893) ..... 138

- Diphenylmethane. (Albrecht.) (xiv, 1895) ..... 475

- Direct-dyeing. (Weber.) (xi, 1892) ..... 981

- Direct-dyeing, Production of:  
(P) Abel. From The Actiengesellschaft für Anilin Fabrikation. (xiv, 1895) ..... 861, 861, 862

- (P) Newton. From The Farbenfabriken vormals Bayer und Co. (xiii, 1894) ..... 245

- (P) Wilcox. From The Farbenfabriken vormals Bayer und Co. (ix, 1890) ..... 1032

- Direct-dyeing Yellow, Production of. (P) Brooke and others. (xiv, 1895) ..... 266

- Disazo- and Tetraazo-. (viii, 1889) ..... 279

- Disazo, Production of:  
(P) Johnson. From The Badische Anilin und Soda Fabrik. (ix, 1890) ..... 854

- (P) Pitt. From Cassella and Co. (xiii, 1894) 245, 245

- Dyeing Blue with Mordants, Manufacture of. (P) Abel. From The Actiengesellschaft für Anilin Fabrikation. .... (xiii, 1894), 1189; (xiv, 1895), 747, 748

- Dyeing Cotton without Mordant, Production of. (P) Rohner. (xii, 1893) ..... 351

- Dyeing on Unmordanted Cotton. (P) Petersen-Müller. (xiii, 1894) ..... 725

- Dyeing Properties of Benzidine Azo-. (Mohlan.) (v, 1886) ..... 597

- Dyeing Sand with Azo-. (Mohlan.) (xii, 1893) ..... 675

- Dyeing with Mordants. (P) Heyes. From Sandoz and Co. (xii, 1894) ..... 631

- Effect of Metallic Salts in Development of. (Caberti and Peco.) (xiii, 1894) ..... 946

- Employed in Brewing. (Evans.) (xiv, 1895) ..... 673

- Eosin, Production of. (Mühlhauser.) (vi, 1887) ..... 283

- Estimation of, by Absorption Spectra. (Patterson.) (ix, 1890) ..... 36

- Estimation of Triphenylmethane, with Nascent Bromine. (Vanbel.) (xiv, 1895) ..... 196

- Etherification of Sulphonated. (Fridhomme.) (xiv, 1895) ..... 28

- Exposed to Light, Action of Copper on. (Schoen.) (xii, 1893) ..... 413

- Fast Azo-, on Fibre, Production of. (P) Imray. From The Farberwerke vormals Meister, Lucius und Brüning. (xiv, 1895) ..... 966

- Fast Yellow Azo, Production of. (P) Imray. From The Farberwerke vormals Meister, Lucius und Brüning. (xi, 1892) ..... 515

- Fastness of, on Textiles. (Joffre.) (vii, 1888) ..... 671

- Fixing Aniline. (Blanche.) (iii, 1884) ..... 166

- Fixing Organic, on Fibres. (P) Schevelin and Mindovsky. (ix, 1890) ..... 612

- For Cotton. (Erdmann.) (vi, 1887) ..... 816

- For Cotton, A Blue. (Müller.) (vi, 1887) ..... 215

- For Dyeing and Printing:  
(P) Dreyfus. (xi, 1890) ..... 286

- (P) Durand, Huguenin, and d'Andiran. (xiii, 1894) ..... 1055

- (P) Read Holliday and Sons, Ltd., and Holliday. (xiii, 1894) ..... 511

- For Dyeing and Printing, Production of. (P) Johnson. From Caro. (vii, 1888) ..... 745

- For Dyeing, Painting, &c. (P) Chadwick. (vii, 1888) ..... 321

- For Glass, Composition of. (Hattensaur.) (x, 1891) ..... 770

- For Jute and Leather, Manufacture of. (P) Lake. From Oehler. (x, 1891) ..... 831

- For Painting, &c. (P) Niensstaedt and others. (xiii, 1894) ..... 648

- For Photographs, Manufacture of. (P) Boult. From Bruns. (xi, 1892) ..... 679

- For Wine. (vi, 1887) ..... 839

- For Wines and Liqueurs. (iii, 1884) ..... 517

- For Wool-dyeing, Production of. (P) Imray. From The Farberwerke vormals Meister, Lucius und Brüning. (x, 1891) ..... 633

- For Wool, Manufacture of Black-Blue to Black Disazo. (P) Imray. From Society of Chemical Industry in Basle. (xiv, 1895) ..... 1042

- For Wool, Production of. (P) Wilcox. From The Farbenfabriken vormals Bayer und Co. (xii, 1893) 350

- Formation of Acridine. (Mohlan and Fritzsche.) (xii, 1893) ..... 750

|                                                                                                                                                        |      |
|--------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| Formation of, from Aromatic Acids. (Zulkowsky.) (iii, 1884).....                                                                                       | 440  |
| Formation of, from Tetrahydroquinoline. (Lellmann and Boyl.) (ix, 1890).....                                                                           | 330  |
| From a Substituted Meta-Diamine, Production of. (P) Imray. From La Société des Matières Colorantes. (ix, 1890).....                                    | 1124 |
| From Acetnaphthylene-Diamine-Sulpho Acids. (P) Pitt. From Cassella and Co. (xiii, 1894).....                                                           | 801  |
| From Action of Phenols on Aromatic Aldehydes. (Zulkowsky.) (iii, 1884).....                                                                            | 371  |
| From Alizarin Blue. (P) Imray. From Farbwerke vormals Meister, Lucius and Brüning. (xi, 1892).....                                                     | 29   |
| From Alkylated Hydroxynaphthalene Sulphonic Acids. (P) Newton. From Farbenfabriken vormals Bayer and Co. (xiii, 1894).....                             | 145  |
| From Alpha-Naphtholdisulpho Acid. (P) Lake. From Leonhardt..... (vii, 1888), 672; (viii, 1889).....                                                    | 770  |
| From Alpha-Oxyvitic Acid, Production of. (P) Johnson. From Heyden Nachfolger. (xii, 1893).....                                                         | 441  |
| From Amidonaphtholdisulpho Acid. (P) Newton. From Farbenfabriken vormals Bayer. (xiii, 1894).....                                                      | 943  |
| From Amidonaphtholsulpho Acid. (P) Pitt. From Cassella and Co. (xiii, 1894).....                                                                       | 244  |
| From Amidonaphtholsulpho Acids. (P) Newton. From Farbenfabriken vormals Bayer. (xiii, 1894).....                                                       | 800  |
| From Amidonaphtholsulphonic Acid, Production of. (P) Pitt. From Cassella and Co. (ix, 1890), 935; (xi, 1892).....                                      | 741  |
| From Aniline. (P) Pinkey. (vii, 1888).....                                                                                                             | 31   |
| From Anthraquinone:<br>(P) Newton. From Farbenfabriken vormals Bayer and Co. (xii, 1893), 755; (xiii, 1894), 723, 1190<br>(P) Walder. (vii, 1888)..... | 32   |
| (P) Wilcox. From Farbenfabriken vormals Bayer..... (xi, 1892), 513, 740; (xii, 1893), 142; (xiv, 1895), 30                                             |      |
| From Anthraquinone and Alizarin Blue. (P) Wilcox. From Farb. vormals Bayer and Co. (xi, 1892).....                                                     | 514  |
| From Anthraquinone-Disulphonic Acid. (vii, 1888).....                                                                                                  | 116  |
| From Azoxyaniline, Manufacture of. (P) Imray. From La Société des Matières Colorantes, &c. (ix, 1890).....                                             | 1124 |
| From Benzidine. (P) Wilcox. From Farbenfabriken vormals Bayer and Co. (xi, 1892).....                                                                  | 516  |
| From Benzidine Tetraethyl Ether. (Colson.) (viii, 1889).....                                                                                           | 451  |
| From Betanaphtholdihydroquinone, Production of. (P) Newton. From Farb. vorm. Bayer. (xiii, 1894).....                                                  | 31   |
| From $\beta$ -Naphthol, Preparation of. (i, 1882).....                                                                                                 | 399  |
| From Betanaphtholmonosulphonic Acids. (P) Wetter. From Leipziger Anilinfabrik. (iv, 1885).....                                                         | 339  |
| From Betanaphthylaminesulphonic Acid. (P) Green. (viii, 1889).....                                                                                     | 878  |
| From Betanaphthylaminesulphonic Acids. (P) Farbfabrikate late Bronner. (ii, 1883).....                                                                 | 536  |
| From $\beta$ -resoreyic Acid. (P) Muhlert. (xiii, 1894).....                                                                                           | 632  |
| From Carbotriethoxyhexabromide. (Helf and Urech.) (ii, 1883).....                                                                                      | 376  |
| From Chloroiodic Bases, Manufacture of. (P) Ostermeyer and Dittmar. (iv, 1885).....                                                                    | 453  |
| From Chrysianiline. (Trillat and Raczkowski.) (xi, 1892).....                                                                                          | 737  |
| From Coal-Tar Products. (P) Kendall. (viii, 1889).....                                                                                                 | 702  |
| From Coal-Tar Quinoline, Preparation of. (Spalteholz.) (iii, 1884).....                                                                                | 25   |
| From Condensation Products of Formic Aldehyde with Benzidine, &c. (P) Durand, Huguenin, and D'Andiran. (xii, 1893).....                                | 756  |
| From Cotton-Seed Oil. (P) Tall and Thompson. (vii, 1888).....                                                                                          | 756  |
| From Derivatives of Tannin and Catechin. (P) Durand and others. (vii, 1889).....                                                                       | 981  |
| From Di- and Tri-Amines. (Grevingk.) (iv, 1885).....                                                                                                   | 400  |
| From Diamido Base, Production of. (P) Imray. From The Farbwerke vormals Meister, Lucius und Brüning. (xiii, 1894).....                                 | 384  |
| From Diamido-Dibenzimidazols. (P) Imray. From The Farbwerke vormals Meister, Lucius und Brüning. (xii, 1894).....                                      | 941  |
| From Diamidodicylyls. (Nolting and Stricker.) (viii, 1889).....                                                                                        | 114  |
| From Diamidoethoxy-diphenyl Sulphonic Acid. (Feer.) (vii, 1888).....                                                                                   | 839  |
| From Diazo Compounds with Resorein Azo Compounds. (P) Actienges. für Anilin Fab. (i, 1882).....                                                        | 404  |
| From Dihydroxybenzoic Acid, Production of. (P) Johnson. From The Badische Anilin und Soda Fabrik. (x, 1891).....                                       | 759  |
| From Dimethylaniline and Chloranil. (Wichelhaus.) (iii, 1884).....                                                                                     | 26   |
| From Dioxydiphenylmethane. (P) Durand, Huguenin, and D'Andiran. (xii, 1893).....                                                                       | 756  |
| From Dioxynaphthalene-mono-sulpho Acid. (P) Imray. From Basle Chemical Works Bindschedler. (xiii, 1894).....                                           | 632  |
| From Dioxynaphthoic-mono-sulpho Acid. (P) Imray. From Basle Chemical Works Bindschedler. (xii, 1894).....                                              | 632  |

| Of the Benzene Group. (Hermann and Rey.) (ix, 1890).....                                                                                             | 489      |
| Of the Fluorescein Group. (Mohlau and Koch.) (xiv, 1895).....                                                                                        | 475      |
| Of the Galanga Root. (Johns.) (i, 1882).....                                                                                                         | 315      |
| Of the Indian Dyestuff "Tesu." (Hummel and Cavallo.) (xiii, 1894).....                                                                               | 144      |
| Of the Indigo Group. (P) Johnson. From The Badische Anilin und Soda Fabrik. (xiv, 1895).....                                                         | 177      |
| Of the Induline Series, Manufacture of a New. (P) Imray. From The Farbwerke vormals Meister, Lucius, and Brüning.....(ix, 1890), 695; (x, 1891)..... | 132      |
| Of the Naphthylamine Series, Reduction Products from Azo. (Witt.) (viii, 1889).....                                                                  | 276      |
| Of the Oxkyetone Group, Preparation of. (P) Johnson. From The Badische Anilin und Soda Fabrik.....(ix, 1890), 497, 497, 609; (x, 1891).....          | 539      |
| Of the Phthalene Group, Manufacture of. (P) Imray. From Basle Chemical Works Bindschedler. (xiv, 1895).....                                          |          |
| Of the Rosaniline Group, Constitution of. (Rosenstiehl.) (xii, 1893).....                                                                            | 591      |
| Of the Rosaniline Group, Preparation of. (P) Greiff. (i, 1882).....                                                                                  | 21       |
| Of the Rosaniline Group, Preparation of, from Nitro-leuco Bases of Triphenylmethane. (P) Fischer. (i, 1882).....                                     | 146      |
| Of the Safranin Group: (Bindschedler.) (iii, 1884).....                                                                                              | 27       |
| (Nietzki.) (iii, 1884).....                                                                                                                          | 27       |
| Of the Triphenylmethane Group: (Hofmann.) (xii, 1893).....                                                                                           | 748      |
| (Noelting.) (ix, 1890).....                                                                                                                          | 52, 279  |
| (Noelting, Polonowsky, and Skawinski.) (xi, 1892).....                                                                                               | 25       |

|                                                                                                                                                                                       |          |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| Of the Triphenylmethane Series, Blue and Green. (P) Imray. From The Farbwerke vormals Meister, Lucius, and Brünig. (xii, 1893).....                                                   | 824      |
| Of Triphenylmethane Series, Production of Blue. (P) Imray. From The Society of Chemical Industry of Basle. (xiii, 1894).....                                                          | 1055     |
| Of Wines. (Monnet.) (ix, 1890).....                                                                                                                                                   | 657      |
| Of Yellow Silk, Properties of. (Dubois.) (ix, 1890).....                                                                                                                              | 1124     |
| On Textile Fibres, Fixation of. (P) Collin and Benoit. (vi, 1887).....                                                                                                                | 595      |
| Orange Azo-Colours. (Mühlhauser.) (vi, 1887)....                                                                                                                                      | 591      |
| Orange, Production of. (P) Shillito. From Geigy. (xiii, 1894).....                                                                                                                    | 31       |
| Orange-Red, Production of. (Ronsin.) (vi, 1887)....                                                                                                                                   | 724      |
| Orange-Red, Production of, from Flavopurpurin. (P) Imray. From The Farbwerke vormals Meister, Lucius, and Brünig. (ix, 1890).....                                                     | 854      |
| Orange Yellow, Production of. (P) Imray. From The Actiengesellschaft für Anilin Fabrikation. (ix, 1890).....                                                                          | 1032     |
| Oxazine, The. (Nietzki and Bossi.) (xii, 1893)....                                                                                                                                    | 137      |
| Oxydophenolic, from Gallanilide and Galloparatoluide. (Cazeneuve.) (xiii, 1894).....                                                                                                  | 720      |
| "Permitted," and Saffron Surrogate. (Weyl.) (vii, 1888).....                                                                                                                          | 130      |
| Perthiocyangen as a Yellow. (Schmid.) (iii, 1884).....                                                                                                                                | 166      |
| Phenazine a Source of. (Berntsen and Schweitzer.) (vi, 1887).....                                                                                                                     | 213      |
| Polyazo, Production of:<br>(P) Abel. From Durand and Co. (xii, 1893)....                                                                                                              | 674      |
| (P) Imray. From The Society of Chemical Industry in Basle. (xiv, 1895).....                                                                                                           | 263      |
| Polyoxy Thionine Dyeing on Mordants, Production of. (P) Imray. From The Society of Chemical Industry in Basle. (xiii, 1894).....                                                      | 879      |
| Production and Application of:<br>(P) Bobenif. (vii, 1888).....                                                                                                                       | 498      |
| (P) Wilcox. From The Farbenfabriken vormals F. Bayer and Co. (ix, 1890).....                                                                                                          | 854      |
| Production and Fixing of, by Electricity. (Hummel.) (iv, 1885).....                                                                                                                   | 306      |
| Production of:<br>(P) Abel. From Actiengesellschaft für Anilin Fabrikation.....(xii, 1893), 36, 674; (xiii, 1894), 246, 724; (xiv, 1895), 145, 263, 265, 361                          |          |
| (P) Abel. From Durand and Huguenin. (iii, 1884).....                                                                                                                                  | 165      |
| (P) Abel. From Farbwerke vormals Meister, Lucius, and Brünig. (ii, 1883).....                                                                                                         | 410      |
| (P) Abel. From Roth.....(v, 1886), 662; (vi, 1887), 595                                                                                                                               |          |
| (P) Baruch and Goldsobel. (xiv, 1895).....                                                                                                                                            | 565      |
| (P) Bedford.....(vii, 1888), 619; (ix, 1890), 497                                                                                                                                     |          |
| (P) Bennett. (vii, 1888).....                                                                                                                                                         | 432, 830 |
| (P) Clark. From Farb. vormals Brunner. (v, 1886).....                                                                                                                                 | 523      |
| (P) Clayton Aniline Co., Ltd., Brunner, and Hall. (ix, 1890).....                                                                                                                     | 854      |
| (P) Clayton Aniline Co. and Hall. (x, 1891).....                                                                                                                                      | 133      |
| (P) Dreyfus.....(viii, 1889), 117; (xi, 1892), 29                                                                                                                                     |          |

| (P) Imray. From The Society of Chemical Industry, Basle. (x, 1891)                                                           | 459           |
| Salicylic Acid Azo-. (Bona.) (xiii, 1894)                                                                                    | 381           |
| Scheme for Detection of Artificial. (Weingartner.) (vi, 1887)                                                                | 151           |
| Scheme for Detection of Organic. (Witt.) (v, 1886)                                                                           | 249           |
| Separ. of Solid Matter from. (P) Reid. (vii, 1888)                                                                           | 121           |
| Soluble Blue, Production of:                                                                                                 |               |
| (P) Imray. From La Société des Matières Colorantes et Chapuis. (x, 1891)                                                     | 132           |
| (P) Lake. From Oehler. (x, 1891)                                                                                             | 132           |
| Solutions of, Production of. (P) Johnson. From The Badische Anilin und Soda Fabrik. (vi, 1887)                               | 437           |
| Substances from Turmeric. (Jackson and Menke.) (i, 1882)                                                                     | 365           |
| Substances used in Production of. (P) Kern. (vi, 1887)                                                                       | 508           |
| Substantive Cotton, Production of. (P) Dawson and Hirsch. (x, 1891)                                                          | 133           |
| Substantive, Production of. (P) Durand, Huguenin, and d'Andiran. (xiii, 1894)                                                | 802           |
| Sulpho Acids of Naphthalene, Production of. (P) Johnson. From The Badische Anilin und Soda Fabrik. (x, 1891)                 | 831, 831      |
| Sulpho, Production of, by Electrolysis. (P) Capitaine. From Ewer and Pick. (iv, 1885)                                        | 453           |
| Synthesis of Indigo and other. (Heumann.) (ix, 1890)                                                                         | 1121          |
| Tabular Survey of the Artificial Organic. (Schultz and Julius.) (vi, 1887)                                                   | 653, 721      |
| Tests of, for Fastness to Light and Resistance to Lime. (Stössel.) (ix, 1890)                                                | 936           |
| Tetrazo, Production of:                                                                                                      |               |
| (P) Durand, Huguenin, and d'Andiran. (xiii, 1894)                                                                            | 146           |
| (P) Newton. From The Farbenfabriken vormals Bayer and Co. (xiii, 1894)                                                       | 511           |
| (P) Thompson and Moore. (xiii, 1894)                                                                                         | 384           |
| Tetrazole, Production of. (P) Imray. From La Société des Matières Colorantes et Produits Chimiques de St. Denis. (vii, 1888) | 563           |
| Theory of Formation of. (Bursilowski.) (vii, 1888)                                                                           | 384           |
| "Thiamines," Prod. of. (P) Bennett. (vi, 1887)                                                                               | 726, 726      |
| Thionine, Production of. (P) Imray. From Farbwerke vormals Meister, Lucius, and Brünig. (xiii, 1894)                         | 247           |
| To Dye Cotton without Mordant, Manufacture of. (P) Abel. From The Actien Gesellschaft für Anilin Fabrikation. (xiv, 1895)    | 861           |
| Transformation of Diphenylmethane Derivatives into. (Walter.) (xiv, 1895)                                                    | 744           |
| Triphenylmethane, Investigation of. (Haller and Müller.) (xiv, 1895)                                                         | 859           |
| Triphenylmethane, Production of:                                                                                             |               |
| (P) Pitt. From Cassella and Co. (xi, 1892)                                                                                   | 28            |
| (P) Shillito. From Geigy and Co. (ix, 1890)                                                                                  | 172           |
| Unsymmetrical Acid Green, Production of. (P) Wilcox. From The Farbenfabriken vormals Bayer and Co. (ix, 1890)                | 285           |
| Violet. (P) Koehlin. (i, 1882)                                                                                               | 225           |
| Violet and Blue, Prep. of. (P) Majert. (i, 1882)                                                                             | 102           |
| Violet and Blue, Production of. (P) Abel. From The Farbwerke vormals Meister, Lucius, and Brünig. (iv, 1885)                 | 339, 400      |
| Violet, from Paramidophenol. (Lauth.) (iv, 1885)                                                                             | 398           |
| Violet, from Residues of Gas Purifiers. (Gasch.) (ix, 1890)                                                                  | 923           |
| Violet, Production of:                                                                                                       |               |
| (P) Abel. From The Actien Gesellschaft für Anilin Fabrikation. (x, 1891)                                                     | 358           |
| (P) Haddan. From Hassenkamp and Farbenfabriken vormals Bayer and Co. (iv, 1885)                                              | 205           |
| (P) Shillito. From Geigy and Co. (viii, 1889)                                                                                | 981           |
| Weselsky's Resoreinol. (Nietzki and others.) (ix, 1890)                                                                      | 489           |
| Which Combine with Mordants. (Kostanecki.) (vii, 1888)                                                                       | 33, 33        |
| Which Dye Mordanted Fibres. (Kostanecki.) (viii, 1889)                                                                       | 698           |

|                                                                                                                                        |           |
|----------------------------------------------------------------------------------------------------------------------------------------|-----------|
| Yellow. (P) Grassier. (i, 1882)                                                                                                        | 225       |
| Yellow and Brown, Production of. (P) Nietzki. (vii, 1888)                                                                              | 839       |
| Yellow and Orange, Production of:                                                                                                      |           |
| (P) Imray. From La Société des Matières Colorantes et others. (iii, 1884)                                                              | 319       |
| (P) Johnson. From The Badische Anilin und Soda Fabrik. (v, 1886)                                                                       | 427       |
| (P) Lake. From Oehler. (viii, 1889)                                                                                                    | 456       |
| Yellow Basic, Production of:                                                                                                           |           |
| (P) Imray. From Farbwerke vormals Meister, Lucius, and Brünig. (xiv, 1885)                                                             | 800       |
| (P) Imray. From The Society of Chemical Industry, Basle. (x, 1891)                                                                     | 132       |
| Yellow, Blue, and Violet, Production of. (P) Lake. From Vignon and Co. (iv, 1885)                                                      | 453, 454  |
| Yellow, from Carbazol, Production of. (P) Johnson. From The Badische Anilin und Soda Fabrik. (viii, 1889)                              | 771, 771  |
| Yellow, from Gallic Acid, Production of. (P) Johnson. From The Badische Anilin und Soda Fabrik. (vi, 1887)                             | 437       |
| Yellow, Orange, and Brown. (P) Nolting and Salis. (iii, 1884)                                                                          | 27        |
| Yellow, Orange, and Brown, Alizarin-like. (P) Shillito. From Geigy. (viii, 1889)                                                       | 702       |
| Yellow, Orange, and Red, Production of. (P) Harmsen. (ii, 1883)                                                                        | 410, 536  |
| Yellow, Orange, Red, and Violet Azo-, Production of. (P) Imray. From La Société Anon. des Matières Colorantes. (vii, 1888)             | 432       |
| Yellow, Production of:                                                                                                                 |           |
| (P) Iahl and Co. (ii, 1883)                                                                                                            | 243       |
| (P) Erskine. From The Farbenfabriken vormals Bayer and Co. (iv, 1885), 490; (ix, 1890)                                                 | 497       |
| (P) Farbwerke vormals Meister, Lucius, and Brünig. (ii, 1883)                                                                          | 409       |
| (P) Forel. (vii, 1885)                                                                                                                 | 320, 320  |
| (P) Geigy. (x, 1891)                                                                                                                   | 762       |
| (P) Griew. From The Farbenfabriken vormals Bayer and Co. (iv, 1885), 491; (ix, 1890)                                                   | 934       |
| (P) Imray. From The Farbwerke vormals Meister, Lucius, and Brünig. (x, 1891)                                                           | 459       |
| (P) Jacobson. (iii, 1884)                                                                                                              | 28        |
| (P) Levinstein. (viii, 1889), 41; (xiv, 1895)                                                                                          | 567       |
| (P) Machenhauer. (ix, 1885)                                                                                                            | 279       |
| (P) Rudolph. (i, 1882)                                                                                                                 | 226       |
| (P) Shillito. From Geigy. (x, 1891)                                                                                                    | 132       |
| (P) Wilcox. From The Farbenfabriken vormals Bayer and Co. (ix, 1890)                                                                   | 1032      |
| Yellow to Orange, Production of. (P) Shillito. From Feer. (ix, 1890)                                                                   | 498       |
| Yellow to Red-Brown, Production of. (P) Imray. From Farbwerke vormals Meister, Lucius, and Brünig. (xii, 1893)                         | 1024      |
| Yellowish-Red, Production of. (P) Lake. From Leonhardt and Co. (xi, 1892)                                                              | 516       |
| Colouring Principle of Toddalia Asuleata and Evodia Meliafolia. (Perkin and Hummel.) (xiv, 1895)                                       | 476       |
| Colouring Principles in Mang-koudou. (Perkin and Hummel.) (xiii, 1894)                                                                 | 940, 1054 |
| Colouring Principles of Ventilago Madrasputana. (Perkin and Hummel.) (xiv, 1895)                                                       | 27        |
| Condensation Products, Employment of Anhydrous Oxalic Acid in Formation of. (Anschütz.) (xi, 1884)                                     | 439       |
| Condensation Products of Amines. (P) Newton. From Farbenfabriken vormals Bayer and Co. (xiii, 1894)                                    | 801       |
| Congo-Red, Constitution of. (Witt.) (v, 1886)                                                                                          | 449       |
| Cresol-Carboxylic Acid. (Wende.) (v, 1886)                                                                                             | 599       |
| Cresols, Manufacture of. (P) Lake. From Leonhardt and Co. (xi, 1892)                                                                   | 28        |
| Croceine Scarlet &c., Manufacture of. (P) Farbenfabriken vormals Bayer and Co. (ii, 1883)                                              | 172       |
| Cumene Sulphonic Acids, Normal. (Claus and Weizel.) (ix, 1890)                                                                         | 599       |
| Cumidine, A New. (Engel.) (iv, 1885)                                                                                                   | 739       |
| Cumidine, Crystallised. (Hofmann.) (ix, 1883)                                                                                          | 241       |
| Cumidine, Manufacture of Solid. (P) Abel. From Actien Gesellschaft für Anilin Fabrikation. (ii, 1883)                                  | 243       |
| Cumidine, Preparing Solid. (P) Actien Gesellschaft für Anilin Fabrikation. (ii, 1883)                                                  | 242       |
| Dehydrothiolioidine. (Jacobsen.) (ix, 1890)                                                                                            | 49        |
| Dehydrothiolioidine, Synthesis of. (Gattermann and Nenberg.) (xi, 1892)                                                                | 673       |
| Derivatives of Azonaphthalene. (Nietzki and Goll.) (v, 1886)                                                                           | 238       |
| Derivatives of Oxazine and Eurlhodine Series. (Lauth.) (xiii, 1894)                                                                    | 628       |
| Derivatives of Paramethylsatin. (Zanastovic.) (v, 1886)                                                                                | 237       |
| Derivatives of Phenolphthalein. (Haller and Guyot.) (xiv, 1895)                                                                        | 360       |
| Diacyclopiperazines, $\alpha$ -, $\beta$ -, and Abnormal Reactions in Formation of Piperazines. (Bischoff and Nastvogel.) (viii, 1889) | 978       |
| Diacyclopiperazines, Production of $\alpha$ -, $\gamma$ -. (Bischoff and Nastvogel.) (viii, 1889)                                      | 977       |
| Di-alkyl-meta-amido-Cresols, Manufacture of. (P) Lake. From Leonhardt and Co. (xi, 1892)                                               | 28        |
| Diamido Bases, Manufacture of Unsymmetric. (P) Durand, Huguenin, and d'Andiran. (xiii, 1894)                                           | 146       |

COLOURING MATTERS AND DYES, VARIOUS—*cont.*

|                                                                                                                                          |      |
|------------------------------------------------------------------------------------------------------------------------------------------|------|
| Diamido Compounds and Azo-Colours, Production of. (P) Ptl. From Weinberg. (vii, 1888).....                                               | 672  |
| Diamidobenzophenones. (Wichelhaus.) (viii, 1889).....                                                                                    | 536  |
| Diamidocarbazol, Synthesis of a, from Benzidine. (Tauber.) (ix, 1890).....                                                               | 1123 |
| Diamidodithienimidazoles, Manufacture of. (P) Imray, From Farberwerke vorm. Meister, Lucius, and Brünig. (xiii, 1894).....               | 941  |
| Diamidophenols, Some Properties of. (Reverdin and de la Harpe.) (xi, 1892).....                                                          | 157  |
| Diamidosulphobenzide and its Derivatives. (Lauth.) (xi, 1892).....                                                                       | 737  |
| Diamidotriphenylmethane, Preparation of. (Mazzara.) (iv, 1885).....                                                                      | 584  |
| Diamines, Action of, on Diacetones. (Coombes.) (viii, 1889).....                                                                         | 976  |
| Dianines and Monamines, Simultaneous Oxidation of. (Bindschedler.) (ii, 1883).....                                                       | 270  |
| Dianilidoguanine-anil and Azophenine. (Bandrowski.) (vii, 1888).....                                                                     | 562  |
| Diazines, Hydrated, of the Aromatic Series. (Bischoff.) (viii, 1889).....                                                                | 976  |
| Diazo- and Hydrazine Compounds of the Quinoline Bases. (Böttiger.) (x, 1891).....                                                        | 998  |
| Diazo Compound, Manufacture of. (P) Altschul. (xiv, 1895).....                                                                           | 477  |
| Diazo-Compounds, Action of. (Griess.) (i, 1882).....                                                                                     | 414  |
| Diazo-Compounds, Action of Alcohol on. (Rensen.) (iv, 1885).....                                                                         | 275  |
| Diazo-Compounds, Action of, on $\beta$ -Naphthylamine. (Lawson.) (iv, 1885).....                                                         | 395  |
| Diazo-Compounds, Action of, on $\beta$ -Naphthylamine, and on $\alpha$ , $\beta$ -Naphthylendiamine. (Lawson.) (v, 1886).....            | 26   |
| Diazo-Compounds and Nitrosamines. (Schraube and Schmidt.) (xiii, 1894).....                                                              | 588  |
| Diazo Compounds in Alkaline Solution, Decomposition of. (Friedlander.) (ix, 1890).....                                                   | 50   |
| Diazo Compounds, Production of. (P) Johnson, From Badische Anilin und Soda Fabrik. (xiii, 1894).....                                     | 1189 |
| Diazo Compounds, Production of Stable. (P) Imray, From The Farberwerke vormals Meister, Lucius, and Brünig. (xiv, 1895).....             | 962  |
| Diazo Compounds, Rate of Decomposition of. (Hausser and Müller.) (xi, 1892).....                                                         | 672  |
| Diazo Compounds, Stability of. (Hirsch.) (x, 1891).....                                                                                  | 535  |
| Diazo Group, Introduction of, into Aromatic Para-Compounds. (Grüss.) (iii, 1884).....                                                    | 517  |
| Diazo-Amido Bodies, Universal Reaction of. (Hennmann and Oeconomides.) (vi, 1887).....                                                   | 541  |
| Diazo-Amido Compounds. (Goldschmidt and Melinari.) (vii, 1888).....                                                                      | 672  |
| Diazoamidobenzene. (Fischer.) (iii, 1884).....                                                                                           | 370  |
| Diazoamidobenzene, Action of Phenol on. (Hennmann and Oeconomides.) (vi, 1887).....                                                      | 436  |
| Diazoamidobenzoic Acid. (Noelting.) (xi, 1892).....                                                                                      | 343  |
| Diazobenzene-Anilide, Relation of, to Amidazobenzene. (Friswell and Green.) (iv, 1885).....                                              | 740  |
| Diazo-cumene, Production of, from Solid Cumidine. (P) Abel, From Actien Gesellschaft für Anilin Fabrikation. (ii, 1883).....             | 243  |
| Diazonaphthalimenesulphonic Acid, Colouring Matter from $\alpha$ . (P) Farbenfabriken vormals Bayer and Co. (ii, 1883).....              | 243  |
| Diazo-Salts, Preparation of. (P) Feer. (xiv, 1895).....                                                                                  | 800  |
| Dibromnitrosophenol. (Fischer and Hepp.) (vii, 1888).....                                                                                | 316  |
| Dichloroethers, Condensation of, with the Cresols. (Bruckner.) (ix, 1890).....                                                           | 929  |
| Dichloro- $\alpha$ -naphthoquinone Sulphonic Acid. (Claus and Van der Cloet.) (vii, 1888).....                                           | 319  |
| Dichloronaphthalenes, Some Derivatives of 1:3. (Cléve.) (ix, 1890).....                                                                  | 694  |
| Dichloronaphthalenesulphonic Acid, 1:6:4. (Cléve.) (x, 1891).....                                                                        | 1003 |
| Dichloro-substitution Products of Azobenzene-para-sulphonic Acid. (Janovsky.) (ii, 1883).....                                            | 373  |
| Dichromes from Phenols. (Brunner and Chuit.) (vii, 1888).....                                                                            | 670  |
| Dichromes, Phenoloxochrome, Thymolochrome and Thymonochrome. (Brunner and Chuit.) (vii, 1888).....                                       | 315  |
| Diethylmercaptol, Manufacture of, and a Sulphone therefrom. (P) Johnson, From The Farbenfabriken vormals Bayer and Co. (viii, 1889)..... | 610  |
| Dihydroxydimethylanthraquinones, Isomeric. (Kestanecki and Niementowski.) (v, 1886).....                                                 | 25   |
| Dihydroxynaphthalene, A New. (Claus.) (viii, 1889).....                                                                                  | 535  |
| Dihydroxynaphthalene Sulpho-Acids, Production of. (P) Wilcox, From The Farbenfabriken vormals Bayer and Co. (xii, 1893).....             | 594  |
| Dihydroxyxanthone, A New. (Graebe and Eichengrün.) (x, 1891).....                                                                        | 536  |
| Dimethylamine, Action of, in Presence of Aluminium Chloride. (Giraud.) (viii, 1889).....                                                 | 877  |
| Dimethylamine, Action of Sulphur upon. (Mohlan and Krohn.) (vii, 1888).....                                                              | 203  |
| Dimethylamine, Carboxyl Derivatives of. (Lauth.) (x, 1891), 357; (ix, 1894).....                                                         | 244  |
| Dimethylaniline, Manufacture of. (Schoep.) (vi, 1887).....                                                                               | 436  |
| Dimethylaniline, Nitration of. (Noelting.) (v, 1886).....                                                                                | 376  |
| Dimethylanthrazolol. (Birukoff.) (vi, 1887).....                                                                                         | 541  |
| Dimethylortho-anisidine, Nitro Derivatives of. (Grémaux and Lefevre.) (x, 1891).....                                                     | 692  |
| Dinaphthylamine-Monosulphonic Acids, Production of $\beta$ . (Schiff.) (xii, 1893).....                                                  | 34   |

COLOURING MATTERS AND DYES, VARIOUS—*cont.*Dyestuffs—*cont.*

|                                                                                                                     |      |
|---------------------------------------------------------------------------------------------------------------------|------|
| Basic, from Alpha-Naphtho-Quinone-Dichloroimide. (P) Johnson. From Badische Anilin und Soda Fabrik. (xi, 1892)..... | 599  |
| Basic, Manufacture of. (P) Johnson. From Badische Anilin und Soda Fabrik. (xi, 1892).....                           | 599  |
| Basic, Production of. (P) Johnson. From Badische Anilin und Soda Fabrik. (xi, 1892), 514; (xii, 1893), 441          | 441  |
| Black Polyazo, Production of. (P) Pitt. From Cassella and Co. (xiv, 1895).....                                      | 1011 |
| Blue and Violet, Prod. of. (P) Cassella. (i, 1882).....                                                             | 403  |
| Blue Basic, Production of. (P) Johnson. From The Badische Anilin und Soda Fabrik. (x, 1891).....                    | 762  |
| Blue or Violet, Production of:                                                                                      |      |
| (P) Bang. From Dahl. (xiii, 1894).....                                                                              | 879  |
| (P) Newton. From Farbenfabriken vormals F. Bayer and Co. (xiii, 1894).....                                          | 631  |
| Blue, Production of:                                                                                                |      |
| (P) Hewitt. From Cassella and Co. (xi, 1892).....                                                                   | 740  |
| (P) Jefferson. From Dahl. (v, 1886).....                                                                            | 662  |
| (P) Pitt. From Cassella and Co. (xi, 1892).....                                                                     | 514  |
| British Trade in, in 1888. (T.R.) (viii, 1889).....                                                                 | 834  |
| Detection of Adulterations in. (Fairley.) (v, 1886).....                                                            | 286  |
| Detection of on the Fibre. (Lepetit.) (vii, 1888).....                                                              | 773  |
| Diazo, from Perchlornaphtholdisulpho Acid, Production of. (P) Pitt. From Cassella and Co. (xiv, 1895).....          | 32   |
| Diazo-, Production of. (P) Johnson. From The Badische Anilin und Soda Fabrik. (viii, 1889).....                     | 772  |
| Disazo, Prod. of. (P) Bang. From Dahl. (x, 1891).....                                                               | 131  |
| Disazo, Production of Mixed Blue. (P) Sutton. From Cassella and Co. (xii, 1893).....                                | 962  |
| Duty on, in France. (Henry.) (i, 1882).....                                                                         | 317  |
| Employment of some Induline. (Ulrich.) (xii, 1893).....                                                             | 39   |
| Fast to Light and Washing, Production of, on Fibres. (P) Pitt. From Cassella and Co. (xiii, 1894).....              | 390  |
| Fast Yellow, Production of. (P) Pitt. From Cassella and Co. (xiv, 1895).....                                        | 963  |
| Fixing of Artificial, by Means of Ferrocyanides. (Reber.) (iv, 1885).....                                           | 342  |
| From Alizarin-Mono-Sulpho-Acid. (P) Wilcox. From The Farbenfabriken vormals Bayer and Co. (viii, 1889).....         | 772  |
| From Amidonaphtholsulpho Acids. (P) Pitt. From Cassella and Co. (xi, 1892).....                                     | 345  |
| From Amidonaphthol-Sulphonic Acids. (P) Pitt. From Cassella and Co. (xii, 1893).....                                | 674  |
| From Anthrol, Dioxanthracene, and their Sulpho Derivatives, Production of. (P) Liebermann. (i, 1882).....           | 226  |
| From Diazosafranines. (P) Pitt. From Cassella and Co. (xiii, 1894).....                                             | 1191 |
| From Naphthol and Naphthylamine Monosulphonic Acids. (P) Pitt. From Cassella and Co. (vi, 1887).....                | 725  |
| From Naphtholdisulphonic Acid, Manufacture of. (P) Pitt. From Cassella and Co. (vii, 1888).....                     | 431  |
| From Natural Mineral Oils, Producing. (P) Frasch. (xii, 1893).....                                                  | 756  |
| From Oxyethers of Alpha-Naphthylamine and their Sulpho Acids. (P) Pitt. From Cassella and Co. (ix, 1890).....       | 385  |
| From Petroleum, Obtaining. (P) Frasch. (xii, 1893).....                                                             | 756  |
| From Quinones or Phenols, Production of. (P) Geigy. (i, 1882).....                                                  | 404  |
| From Sulpho Acids, Manufacture of. (P) Wilcox. From Farbenfabriken vormals Bayer and Co. (xi, 1892).....            | 399  |
| From Sulphonated Thionines, Production of. (P) Pitt. From Cassella and Co. (x, 1891).....                           | 917  |
| From Tertiary Phenylamines. (P) Actien-Gesellschaft für Anilin Fabrikation. (i, 1882).....                          | 403  |
| German Trade in. (T.R.) (xiii, 1894).....                                                                           | 1114 |
| Imports of, by China. (T.R.) (vi, 1887).....                                                                        | 570  |
| Indigo Blue, Production of. (P) Newton. From Farbenfabriken vormals F. Bayer and Co. (xiv, 1895).....               | 963  |
| Manufacture of:                                                                                                     |      |
| (P) Newton. From Farbenfabriken vormals F. Bayer and Co. (xiv, 1895).....                                           | 145  |
| (P) Pitt. From Cassella and Co. (x, 1891).....                                                                      | 252  |
| Manufacture of Trisazo. (P) Pitt. From Cassella and Co. (xiv, 1895).....                                            | 146  |
| Materials for Production of. (P) Johnson. From The Badische Anilin und Soda Fabrik. (x, 1891).....                  | 759  |
| New. (Von Hoernmann.) (i, 1882).....                                                                                | 319  |
| Nitroso-Resorcinol. (Kostanecki.) (vii, 1888).....                                                                  | 838  |
| Of Rosaniline Group, Preparation of. (P) Greiff. (i, 1882).....                                                     | 449  |
| Of the Rosaniline Group, from Paraleucaniline. (P) Farbwerke vormals Meister, Lucius, and Bruning. (i, 1882).....   | 449  |
| Ortho-Hydroxyazo. (Gibell.) (x, 1891).....                                                                          | 830  |
| Poly-Azo, Production of:                                                                                            |      |
| (P) Newton. From Farbenfabriken vormals F. Bayer and Co. (xiv, 1895).....                                           | 265  |
| (P) Pitt. From Cassella and Co. (xiv, 1895).....                                                                    | 478  |
| Production of:                                                                                                      |      |
| (P) Abel. From Actien Gesellschaft für Anilin Fabrikation. (viii, 1889).....                                        | 980  |

| Metamethylbenzaldehyde, Preparation from. (P) Farberwerke vormals Meister, Lucius, and Brünig. (ii, 1883).....                                                                             | 243      |
| Meta-methoxy-, Meta-ethoxy, and Meta-benzyloxy-para-amido-benzophenones, Manufacture of Dialkylised. (P) Irmay. From The Farberwerke vormals Meister, Lucius, and Brünig. (xii, 1893)..... | 441      |
| Metamethylbenzaldehydes, Preparing. (P) Farberwerke vormals Meister, Lucius, and Brünig. (i, 1882).....                                                                                    | 490      |
| Metanitrodithylaniline, Metanitrodithylaniline, and Reduction Products. (Groll.) (v, 1886).....                                                                                            | 319      |
| Metanitroquinoline. (Claus and Stiebel.) (vii, 1888).....                                                                                                                                  | 32       |
| Metanitrotoluene, Preparation of. (Buehka.) (viii, 1889).....                                                                                                                              | 388      |
| Metaoxybenzaldehydes, Preparing. (P) Farberwerke vormals Meister, Lucius, and Brünig. (i, 1882).....                                                                                       | 490      |
| Metaxylene, Nitro and Amido Derivatives of. (Grevingk.) (iv, 1885).....                                                                                                                    | 203, 300 |
| Metaxylenesulphonic Acids. (Moody.) (xi, 1892).....                                                                                                                                        | 28       |
| Metaxyleneol, Adjacent. (Jacobsen.) (vii, 1889).....                                                                                                                                       | 114      |
| Metaxylidine, Adjacent, Identity of, with Orthoxylidine. (Nörling and Pick.) (viii, 1889).....                                                                                             | 115      |
| Metaxyquinoline, Derivatives of. (Noelting and Trautmann.) (xi, 1892).....                                                                                                                 | 27       |
| Methoxyamido-1:3-dimethylbenzene and its Derivatives. (Hodgkinson and Limpach.) (xi, 1892).....                                                                                            | 900      |
| Methylamines, Production and Separation of. (P) Vidal. (xi, 1892).....                                                                                                                     | 344      |
| Methylanthracenol, Formation of. (Cahn.) (v, 1886).....                                                                                                                                    | 599      |
| Methylanthraquinone and its Derivatives. (Bornstein.) (i, 1882).....                                                                                                                       | 400      |
| Methylene Blue. (iii, 1884).....                                                                                                                                                           | 246      |
| Methylene Blue and Allied Colouring Matters. (Bernthsen.) (iii, 1884).....                                                                                                                 | 327      |
| Methylene Blue, Constitution of. (Erlenmeyer and Bernthsen.) (iii, 1884).....                                                                                                              | 411      |
| Methylene-Blue Group, Studies in the. (viii, 1889).....                                                                                                                                    | 251      |
| Methylene Blue, Manufacture of a. (P) Irmay. From The Farberwerke vorm. Meister, Lucius, and Brünig. (vii, 1888).....                                                                      | 452      |
| Methylglyoxalidine, Production of. (P) Irmay. From Farberwerke vormals Meister, Lucius, and Brünig. (xiv, 1895).....                                                                       | 206      |
| Methyl-para-toluidine. (Bamberger and Wulz.) (x, 1891).....                                                                                                                                | 651      |
| Methylquinoline, Preparation of: (P) Farberwerke vorm. Meister, Lucius, and Brünig. (ii, 1883).....                                                                                        | 1000     |
| (P) Rudolph. (ii, 1883).....                                                                                                                                                               | 243      |
| Methyltriphenylmethane Carboxylic Acid. (vi, 1887).....                                                                                                                                    | 40       |
| Methyltylole, Manufacture of. (Mühlhauser.) (vi, 1887).....                                                                                                                                | 213      |
| Mono- and Dinitronaphthoresorcinol. (Kostanecki.) (viii, 1889).....                                                                                                                        | 434      |
| Mono- and Ditylamine, Production of. (Levi.) (vi, 1887).....                                                                                                                               | 697      |
| Mono-acipiperazines. (Bischoff and Nastvogel.) (viii, 1889).....                                                                                                                           | 505      |
| Mono-thylorane. (Bernthsen and Goske.) (vi, 1887).....                                                                                                                                     | 977      |
| Mono-iodo-Phenols. (Noelting and Stricker.) (vii, 1888).....                                                                                                                               | 506      |
| Monomethylorange. (Bernthsen and Goske.) (vi, 1887).....                                                                                                                                   | 562      |
| Mononitroresorcinol and Mononitrophenol, Preparation of. (Wilgerodt and Ferk.) (v, 1886).....                                                                                              | 506      |
| Mononitroresorcinol. (Fèvre.) (ii, 1883).....                                                                                                                                              | 161      |
| Mono-oxanthones, Constitution of the. (Dreher and Kostanecki.) (xii, 1893).....                                                                                                            | 270, 374 |
| Monosulpho Acid of $\alpha$ -Naphthol. (P) Liebmann and Studer. (vii, 1888).....                                                                                                           | 440      |
| Monosulpho Acid, Separation of $\alpha$ , of $\beta$ -Naphthol. (P) Hadan. From Farbenfabriken vormals Bayer and Co. (iv, 1885).....                                                       | 431      |
| Monosulphonic Acids, Preparation of. (P) Badische Anilin und Soda Fabrik. (ii, 1883).....                                                                                                  | 452      |
| Morindon. (Tharpe and Smith.) (vii, 1888).....                                                                                                                                             | 275      |
| Naphthalene of Substituted Amidophenols. (Ulzer and Holler.) (xiii, 1894).....                                                                                                             | 382      |
| Naphthalene Derivatives. (Witt.) (vii, 1888).....                                                                                                                                          | 790      |
| Naphthalene Derivatives, Sulphonation of. (Dressel and Kothe.) (xiii, 1894).....                                                                                                           | 317      |
| Naphthalene Indigo, $\alpha$ - and $\beta$ -. (Wichelhaus.) (xiii, 1894).....                                                                                                              | 875      |
| Naphthalene, Ortho-, Para-, and Peri-Disulphonic Derivatives of. (Armstrong and Wynne.) (xii, 1893).....                                                                                   | 29       |
| Naphthalene- $\alpha$ -monosulpho Acid, Manufacture of $\alpha$ , $\beta$ -Dihydroxy. (P) Newton. From The Farbenfabriken vormals Bayer and Co. (xiv, 1895).....                           | 592      |
| Naphthalene-1:2'-Disulphonic Acid. (Armstrong and Wynne.) (ix, 1890).....                                                                                                                  | 31       |
| Naphthalenedisulphonic Acid, $\alpha$ -amido-1:3'. (Armstrong and Wynne.) (ix, 1890).....                                                                                                  | 730      |

| Naphthylaminesulphonic Acids, Isomeric $\alpha$ -. (Witt.) (v, 1886)                                                                                            | 164  | Nitrotoluidine from Liquid Dimethylolene: (Bernthsen.) (ii, 1883)                                                                       | 169  |
| Naphthylaminesulphonic Acids, Two $\beta$ -. (Porsling.) (vi, 1887)                                                                                             | 721  | (Ullman.) (iv, 1885)                                                                                                                    | 114  |
| Naphthylaminetrissulphonic Acid, Manufacture of. (P) Abel. From Fischesser and Co. (xiv, 1895)                                                                  | 266  | Nitrotoluidine Sulphonic Acids. (Nietzki and Pollini.) (ix, 1890)                                                                       | 492  |
| Naphthylaminetrissulphonic Acid, Preparation of $\alpha$ -. (P) Farbwerke vormals Meister, Lucius, und Brüning. (ii, 1883)                                      | 536  | Nitrous Acid, Action of, on Tetramethyldiamidobenzophenone. (Herzberg and Polonowsky.) (xi, 1892)                                       | 156  |
| Naphthylenediamine, $m(\alpha\beta)$ . (Urban.) (vi, 1887)                                                                                                      | 542  | Noir-bleu, Manuf. of, from Indigo. (P) Clark. (i, 1882)                                                                                 | 107  |
| Naphthylenediamine, 1:1' or 1:8. (Hinsberg.) (viii, 1889)                                                                                                       | 388  | Octahydro- $\alpha$ -naphthoquinoline. (Bamberger and Stettenheimer.) (xi, 1892)                                                        | 24   |
| Naphthylenediamine, 2:3-. (Friedlander and Zakrzewski.) (xiii, 1894)                                                                                            | 721  | Opiaurin. (Liebemann and Seidler.) (vi, 1887)                                                                                           | 541  |
| Naphthylenediamines. (Ewer and Pick.) (viii, 1889)                                                                                                              | 278  | Orcin Derivatives. (Zulkowski and Peters.) (ix, 1890)                                                                                   | 1123 |
| Naphthylenediamines and their Formation. (Lange.) (vii, 1888)                                                                                                   | 618  | Orcine, Artificial, Preparation of, from Toluene and its Derivatives. (P) Neville. (i, 1882)                                            | 227  |
| Naphthylenediamine-mono-sulpho Acid, Production of. (Dawson and Hirsch.) (x, 1891)                                                                              | 539  | Orcin and other Dioxylolols. (Neville and Winther.) (ii, 1883)                                                                          | 167  |
| Naphthylenediaminesulphonic Acids, Manufacture of. (P) Abel. From Fischesser and Co. (xiv, 1895)                                                                | 479  | Orcin, Conversion of Toluylene-diamine into $\gamma$ -. (Wallach.) (ii, 1883)                                                           | 39   |
| Naphthylsulphate Soda Salt. (Stebbins.) (i, 1882)                                                                                                               | 182  | Orcinol and Resorcinol Colours. (Nietzki and Maackler.) (ix, 1890)                                                                      | 600  |
| Nitraniline, Prep. of $\alpha$ - and $p$ -. (Merz and Riz.) (v, 1886)                                                                                           | 450  | Orcinol from Acetone Dicarboxylic-ether. (Cornelius and Von Pechmann.) (v, 1886)                                                        | 481  |
| Nitration of Benzene. (Meyer.) (viii, 1889)                                                                                                                     | 275  | Orcinol, Methylation of Symmetrical. (Kraus.) (x, 1891)                                                                                 | 914  |
| Nitration under varying conditions. (Noelting and Collin.) (iv, 1885)                                                                                           | 399  | Orcinol, Preparation of. (Winther.) (ii, 1883)                                                                                          | 268  |
| Nitric Acid, Action of Fuming, on Camphor Monochloride. (Cazeuue.) (ii, 1883)                                                                                   | 374  | Orcinol, Synthesis of $\beta$ -. (Kostanecki.) (v, 1886)                                                                                | 519  |
| Nitric Acid, Action of, on Dimethylortho-Anisidine. (Van Romburgh.) (xi, 1892)                                                                                  | 155  | Orthamido-azo Compounds: (Nörling and Witt.) (iii, 1884)                                                                                | 248  |
| Nitro- and Amido Derivatives of Paradiethylamine. (Jaubert.) (xiv, 1895)                                                                                        | 860  | (Wicke.) (v, 1886)                                                                                                                      | 29   |
| Nitro Compounds, Constitution of Coloured. (Armstrong.) (xi, 1892)                                                                                              | 512  | Ortho- and Para-oxy-orthotoluic Acids and Meta-cresol, Manufacture of. (P) Johnson. From Kalle and Co. (xiv, 1895)                      | 800  |
| Nitro Compounds, Reduction of. (Wohl.) (xiii, 1894)                                                                                                             | 876  | Orthoamidobenzaldehyde. (Gabriel.) (i, 1882)                                                                                            | 490  |
| Nitroalizarin, Preparing. (Simon.) (i, 1882)                                                                                                                    | 224  | Orthocinnamic carboxylic Acid, Oxidation of $\beta$ -naphthol to. (Ehrlich and Benedick.) (vii, 1888)                                   | 671  |
| Nitranthraquinone, A New. (Roemer.) (i, 1882)                                                                                                                   | 490  | Ortho-cresol-benzene. (Schroter.) (ix, 1890)                                                                                            | 497  |
| Nitro-azo Compounds and Azo-nitric Acids, Products of. (Janovsky.) (iv, 1885)                                                                                   | 491  | Ortho-cresol-sulphonic Acid. (Hantke.) (vii, 1888)                                                                                      | 32   |
| Nitro-azo Compounds, Intermediate Products of Reduction of. (Janovsky and Erb.) (iv, 1885)                                                                      | 397  | Orthodiamines and $\alpha$ -Amido-phenols, Oxidation Products of. (Fischer and Hepp.) (ix, 1890)                                        | 1028 |
| Nitro-Benzaldehyde, Products of $m$ -, with Phenol, &c. (Varda and Zenoni.) (x, 1891)                                                                           | 830  | Orthodiamines, Oxidation Products of. (Fischer and Heiter.) (xii, 1893)                                                                 | 751  |
| Nitro- $\beta$ -Naphthoquinone, Preparation of. (Zineke.) (xii, 1893)                                                                                           | 35   | Ortho-hydroxyazo Compounds, Constitution of. (Ganelin and Kostanecki.) (xi, 1892)                                                       | 425  |
| Nitroluminescence, Manufacture of. (Mühlhäuser.) (xi, 1892)                                                                                                     | 739  | Ortho-hydroxyazo Derivatives of $\alpha$ -Naphthol. (Noelting and Grandmoulin.) (x, 1891)                                               | 756  |
| Nitro-Cresols, Production of. (Staedel.) (ii, 1883)                                                                                                             | 346  | Ortho-Methylbenzidine, Prep. of. (Hirsch.) (x, 1891)                                                                                    | 40   |
| Nitro-Derivatives of Alizarin and Purpurin. (Brash.) (x, 1891)                                                                                                  | 828  | Orthonitraniline, Manufacture of. (Pokorny.) (xiv, 1895)                                                                                | 25   |
| Nitro-Derivatives of Phenolphthalein. (Hall.) (xii, 1893)                                                                                                       | 141  | Orthonitranilinesulphonic Acid and its Derivatives. (Nietzki and Lerch.) (viii, 1889)                                                   | 116  |
| Nitro-Derivatives, Preparation of. (Armstrong and Rossiter.) (x, 1891)                                                                                          | 694  | Orthonitranilinesulphonic Acid and Orthonitraniline. (Nietzki and Benckiser.) (iv, 1885)                                                | 276  |
| Nitrohydroxy- and Nitro-amido-azo Compounds. (Tanber.) (xiii, 1894)                                                                                             | 28   | Orthonitrobenzaldehyde, Action of, on Aldehyde. (Bayer and Drewsen.) (iii, 1884)                                                        | 27   |
| Nitro-ketone Derived from Camphorsulphophenols. (Cazeuue.) (xi, 1892)                                                                                           | 512  | Orthonitrobenzaldehyde, Prep. of. (Einhorn.) (iii, 1884)                                                                                | 251  |
| Nitro-leuco Bases of Triphenylmethane, Preparation of. (P) Farbwerke vormals Meister, Lucius, and Brüning. (iii, 1884)                                          | 105  | Orthonitrobenzylchloride. (Noelting.) (iii, 1884)                                                                                       | 244  |
| Nitromethoxybenzaldehydes, Isomeric. (Tiemann and Ludwig.) (ii, 1883)                                                                                           | 268  | Orthonitrobenzylchloride, Production of Derivatives of. (P) Fischer. (viii, 1889)                                                       | 772  |
| Nitronaphthalene, $\alpha$ -. Action of Sulphuric Acid on. (Palmaer.) (viii, 1889)                                                                              | 116  | Orthonitrobenzylidenacetone, Preparation of Methylquinoline from. (P) Farbwerke vormals Meister, Lucius, and Brüning. (ii, 1883)        | 243  |
| Nitronaphthalene, Preparation of $\beta$ -. (Lellmann.) (vi, 1887)                                                                                              | 541  | Orthonitrodiphenylamine and its Derivatives. (Schopff.) (ix, 1890)                                                                      | 931  |
| Nitronaphthalenesulphonic Acid, 1:4. (Cleve.) (ix, 1890)                                                                                                        | 604  | Orthonitrometamethylbenzaldehyde, Preparation of. (P) Farbwerke vormals Meister, Lucius, and Brüning. (ii, 1883)                        | 243  |
| Nitro-orthotoluic acid and its Derivatives. (Noelting and Collin.) (iv, 1885)                                                                                   | 399  | Orthonitro-oxyphenylacetic Acid, Behaviour of, with Reducing Agents. (Thate.) (i, 1882)                                                 | 222  |
| Nitro- $p$ -amidophenol, Prod. of $m$ -. (Höhle.) (x, 1891)                                                                                                     | 691  | Orthonitrotoluene. (Strang.) (x, 1891)                                                                                                  | 916  |
| Nitrosodimethylaniline, Preparation of. (Elder.) (iv, 1885)                                                                                                     | 338  | Ortho-oxydiphenylcarbon Acid, Production of. (P) Wilcox. From von Heyden. (xi, 1892)                                                    | 344  |
| Nitrosamines and Nitroso-Bases. (Fischer and Hepp.) (vi, 1887)                                                                                                  | 723  | Orthoquinolinehydrazine, Prod. of. (Dufston.) (x, 1891)                                                                                 | 998  |
| Nitrosamines, Manufacture of. (P) Johnson. From Badische Anilin und Soda Fabrik. (xiv, 1895)                                                                    | 567  | Orthotoluidine and Paratoluidine, Estimation of, by means of Specific Gravity. (Lunge.) (iv, 1885)                                      | 339  |
| Nitroso $\alpha$ -naphthol-disulphonic Acid, Preparation of. (P) Seltzer. (vi, 1888), 226; (ii, 1883)                                                           | 248  | Orthotoluidine, Reactions of. (Schiff and Ostrogovich.) (xiii, 1894)                                                                    | 797  |
| Nitroso-Bases, Action of, on Phenylhydrazine. (Fischer and Wacker.) (viii, 1889)                                                                                | 387  | Orthotoluidine, Separating Paratoluidine from. (P) Lewy. (ii, 1883)                                                                     | 242  |
|                                                                                                                                                                 |      | Orthotoluidine, Separation of, from Paratoluidine and Aniline. (P) Weiler. (ii, 1883)                                                   | 475  |
|                                                                                                                                                                 |      | Orthoxylidene, Constitution of 1,2,4. (Jacobsen.) (iii, 1884)                                                                           | 250  |
|                                                                                                                                                                 |      | Orthoxylidene, 1:2:3, Production of. (Menton.) (x, 1891)                                                                                | 830  |

COLOURING MATTERS AND DYES, VARIOUS—*cont.*

PAGE

|                                                                                                                                      |          |
|--------------------------------------------------------------------------------------------------------------------------------------|----------|
| Oxalic Acid, Compounds of, with $\alpha$ - and $\beta$ -Naphthol. (Staub and Smith.) (iii, 1884).....                                | 442      |
| Oxazines and Eurhodines, Derivatives of. (Lauth.) (xiv, 1895).....                                                                   | 25       |
| Oxidation Compounds of Amidonaphthol Sulphonic Acids. (Reverdin and de la Harpe.) (xi, 1892).....                                    | 397      |
| Oxyanthraquinone, Production of. (P) Imray. From Farbwerte vormals Meister, Lucius, and Brünig. (xiii, 1894).....                    | 878      |
| Oxyanthraquinone, Production of $\alpha$ -. (P) Imray. From Farbwerte vormals Meister, Lucius, and Brünig. (xiv, 1895).....          | 263      |
| Oxyanthraquinones, Chromogenic Properties of. (Liebermann and Kostanecki.) (vi, 1887).....                                           | 724, 818 |
| Oxyazo Compounds. (Meyer and Kreis.) (ii, 1883).....                                                                                 | 376      |
| Oxyazo Compounds, Formation of. (Fischer and Wimmer.) (vi, 1887).....                                                                | 659      |
| Oxymethoxybenzoic Acids, Production of. (P) von Heyden Nachfolger. (ix, 1890).....                                                   | 384      |
| Oxypyrazols, Manufacture of. (P) Abel. From Farbwerte vormals Meister, Lucius, and Brünig. (iii, 1884).....                          | 568      |
| Oxyquinoline, Preparation of. (P) Skrap. (i, 1882).....                                                                              | 21       |
| Oxyquinoline-phenol-sulphonic-oxyquinoline, Production of. (P) Lembach and Wolff. (xii, 1893).....                                   | 258      |
| Oxysulphonic Acids of Naphthalene, Production of. (P) Imray. From The Farbwerte vormals Meister, Lucius, and Brünig. (ix, 1890)..... | 609      |
| Oxyxanthones, Synthesis of. (Kostanecki and Nessler.) (x, 1891).....                                                                 | 915      |
| Paralucaniline, Transforming into Dyes of Rosaniline Group. (P) Farbwerte vormals Meister, Lucius, and Brünig. (i, 1882).....        | 449      |
| Paranilogen, Production of. (P) Imray. From The Farbwerte vormals Meister, Lucius, and Brünig. (xii, 1893).....                      | 1024     |
| Paramidoacetylols, Formation of. (Fischer.) (x, 1891).....                                                                           | 535      |
| Paramidoditetrachloro- $\alpha$ -naphthaquinoline. (Bamberger and Stettenheimer.) (xi, 1892).....                                    | 24       |
| Paramidodiphenylcarbinol. (Baeyer and Lohr.) (ix, 1890).....                                                                         | 931      |
| Paramitrobenzaldehyde and Acetone. (Baeyer and Becker.) (iii, 1884).....                                                             | 26       |
| Paramitrobenzaldehyde, Prep. of. (P) Baeyer. (i, 1882).....                                                                          | 24       |
| Paramitrobenzylidene Chloride, Preparation of. (P) Farbwerte vormals Meister, Lucius, and Brünig. (iii, 1884).....                   | 104      |
| Paramitrocinnamaldehyde, Formation of Ortho- and. (Diehl and Einhorn.) (iv, 1885).....                                               | 740      |
| Paramitrometa-amidobenzene Sulphonic Acid and "Fast Yellow." (Eger.) (viii, 1889).....                                               | 388      |
| Paramitro-orthotoluene Sulphonic Acid. (Hansser.) (ix, 1890).....                                                                    | 798      |
| Paramitroso-aniline, Production of. (Fischer and Hepp.) (vii, 1888).....                                                             | 316      |
| Paramitrosodiphenylamine. (Kita.) (vii, 1888).....                                                                                   | 318      |
| Paramitrotoluene, Action of Alkali on. (Fischer and Hepp.) (xiii, 1894).....                                                         | 29       |
| Paraphenylene Blue. (viii, 1889).....                                                                                                | 189      |
| Pararosaniline and its Salts. (Miolati.) (xiii, 1894).....                                                                           | 143      |
| Pararosaniline, Production of. (P) Baum. (vi, 1887).....                                                                             | 437      |
| Pararosaniline, Synthesis of. (Zimmermann and Müller.) (iv, 1885).....                                                               | 395      |
| Paratoluidine, Action of, on Resorcinol and Quinol. (Hatschek and Zegn.) (v, 1886).....                                              | 161      |
| Paratoluidine, Oxidation of. (Green.) (xiii, 1894).....                                                                              | 143      |
| Paratoluidine, Separating Orthotoluidine from. (P) Lewy. (ii, 1885).....                                                             | 242      |
| Paraxylidine, Crystallisation of. (Michael.) (xii, 1893).....                                                                        | 349      |
| Paraxylidine, Preparation and Properties of. (Witt, Noeltling, and Ford.) (iv, 1885), 741; (viii, 1889).....                         | 274      |
| Paraxylidine, Derivatives of. (Noeltling and Fruehling.) (viii, 1889).....                                                           | 187      |
| Penta- and Tetra-Ethylbenzene. (Jacobsen.) (viii, 1889).....                                                                         | 113      |
| Pentamethylamidobenzene, Preparation of. (Hofmann.) (iv, 1885).....                                                                  | 672      |
| Perechloromethylmercaptan, Formation of Methyl-violet with. (Rathke.) (v, 1886).....                                                 | 320      |
| Phenazine. (Bernthsen.) (v, 1886).....                                                                                               | 661      |
| Phenazine, Chromogenic Character of. (Bernthsen.) (v, 1886).....                                                                     | 661      |
| Phenazine, Pyrogenetic Formation of. (Bernthsen.) (vi, 1887).....                                                                    | 285      |
| Phenazines, Synthesis of. (Eicker.) (x, 1891).....                                                                                   | 355      |
| Phenazoxin, a New Chromogenic Body. (Bernthsen.) (vi, 1887).....                                                                     | 542      |
| Phenol Ether and Oxidiphenyl, Manufacture of. (P) Dawson and Hirsch. (x, 1891).....                                                  | 538      |
| Phenol, Manufacture of Higher Homologues of. (P) Liebmman. (i, 1882).....                                                            | 102      |
| Phenols and Acetic Acid, Condensation Products of. (Rasinski.) (ii, 1883).....                                                       | 169      |
| Phenols, Compounds of Phthalic Acid with. (Baeyer.) (i, 1882).....                                                                   | 446      |
| Phenols, Compounds of, with Amido-Bases. (Dale and Schorlemmer.) (ii, 1883).....                                                     | 268      |
| Phenols, Conversion of, into Anilines. (Bueh.) (iv, 1885).....                                                                       | 276      |
| Phenols, Naphthols, and Resorcin, Preparation of. (P) Actien Gesellschaft für Anilin Fabrikation. (i, 1882).....                     | 226      |
| Phenols of Fluorene and Acenaphthene, Production of. (P) Holliday and Hodgkinson. (iii, 1884).....                                   | 319      |
| Phenolphthalein and Fluorescein Derivatives. (Holler and Guyot.) (xii, 1893).....                                                    | 823      |
| Phenosafranines, Constitution of. (Barbier and Vignon.) (vii, 1888).....                                                             | 31       |

COLOURING MATTERS AND DYES, VARIOUS—*cont.*

PAGE

|                                                                                                                            |                          |
|----------------------------------------------------------------------------------------------------------------------------|--------------------------|
| Phenylacetylene, Artificial Indigo from. (P) Badische Anilin und Soda Fabrik. (ii, 1883).....                              | 243                      |
| Phenylamidoazobenzene Sulphonic Acids, Production of. (P) Dahl and Co. (ii, 1883).....                                     | 243                      |
| Phenylamines, Production and Separation of. (P) Vidal. (xi, 1892).....                                                     | 314                      |
| Phenylazotetrahydro- $\alpha$ -naphthaquinoline. (Bamberger and Stettenheimer.) (xi, 1892).....                            | 23                       |
| Phenylidinsoroseinsol, Isomerie. (Kostanecki.) (vii, 1888).....                                                            | 838                      |
| Phenylenediamine, $\beta$ -dinaphthyl- $p$ -. (Rueff.) (viii, 1889).....                                                   | 452                      |
| Phenylenediamine, Oxidation of $\alpha$ -. (Fischer and Hepp.) (ix, 1890).....                                             | 602                      |
| Phenylhydrazine and Hydroxylamine, Reactions of. (Fischer.) (ix, 1890).....                                                | 50                       |
| Phenylhydrazine, Treatment of, with a New Ethylether. (P) Imray. From Society of Chemical Industry, Basle. (vi, 1887)..... | 726                      |
| Phenylindole, On Pr. 3. (Fischer and Schmidt.) (vii, 1888).....                                                            | 531                      |
| Phenylmethane, Coloured and Colourless Derivatives of Di- and Tri-. (Rosenstiel.) (xiii, 1894).....                        | 798                      |
| Phenyl-Ortho-Oxalate. (Claparede and Smith.) (ii, 1883).....                                                               | 345                      |
| Phthalic Acids, Constitution of. (Meyer.) (x, 1891).....                                                                   | 827                      |
| Phthalic Acid, Preparation of: (Fuchs.) (x, 1891).....                                                                     | 758                      |
| (Laddens.) (x, 1891).....                                                                                                  | 758                      |
| Phthalic Anhydride, Action of, on Quinoline. (Traub.) (ii, 1883).....                                                      | 274                      |
| Phthalides, Discovery of. (Perkin.) (iv, 1885).....                                                                        | 434                      |
| Phthalylchloride, Constitution of. (Meyer.) (iii, 1884).....                                                               | 370                      |
| Picric Acid, Manufacture of. (P) Eisenmann and Arche. (ix, 1890).....                                                      | 385                      |
| Picric Acid, Production of, from Crude Phenols. (P) Thompson. From De Lom de Berg. (ix, 1890).....                         | 1032                     |
| Picrocarmin, Production of. (Gedokt.) (vi, 1887).....                                                                      | 513                      |
| Piperidine Bases. (Lellman and Büttner.) (ix, 1890).....                                                                   | 950                      |
| Ponceau Red of Japan. (Scheurer.) (xii, 1893).....                                                                         | 352                      |
| Primuline and Allied Sulphur Compounds, Constitution of. (Green.) (viii, 1889).....                                        | 783                      |
| Primuline and Isaurin Red. (Keretz.) (vii, 1888).....                                                                      | 561                      |
| Primuline, Constitution of. (Pfitzing and Gattermann.) (viii, 1889).....                                                   | 608                      |
| Printing Ink, Manufacture of. (P) Bibby. (xiii, 1894).....                                                                 | 145                      |
| Prussian Blue, New. (Guignot.) (viii, 1889).....                                                                           | 277                      |
| Prussian Blue, Prep. of Soluble. (Demande.) (i, 1882).....                                                                 | 354                      |
| Pseudocoumarine. (Haller.) (iv, 1885).....                                                                                 | 278                      |
| Pseudocoumidine and Pseudocoumenol, Preparation of. (Edler.) (iv, 1885).....                                               | 338                      |
| Pseudocoumidine, Derivatives of: (Auwers.) (iv, 1885).....                                                                 | 739                      |
| (Noeltling and Baumann.) (iv, 1885).....                                                                                   | 397, 489                 |
| Purpurin and Xantho Purpurin, Synthesis of. (Noah.) (v, 1886).....                                                         | 319                      |
| Purpurine, Oxidation of. (Dralle.) (iii, 1884).....                                                                        | 242                      |
| Purpurogallol. (Hooker.) (vii, 1888).....                                                                                  | 31                       |
| Pyrazine, Basic Compounds derived from. (P) Newton. From The Farbenfabriken vormals Bayer and Co. (xiii, 1894).....        | 510                      |
| Pyridine Dicarboxylic Acid. (Noeltling and Collin.) (iv, 1885).....                                                        | 398                      |
| Pyridinemonosulphonic Acid. (Fischer and Reimerschmid.) (ii, 1883).....                                                    | 377                      |
| Pyrocatechol, Action of Chlorine on. (Zincke and Küster.) (ix, 1890).....                                                  | 601                      |
| Pyrocatechin, Production of. (P) Baum. (xiii, 1894).....                                                                   | 879                      |
| Pyrogallol and its Salts. (Godefroy.) (xiv, 1895).....                                                                     | 650                      |
| Pyrogallol-Benzene. (Döbner and Förster.) (ix, 1890).....                                                                  | 496                      |
| Pyronines. (Bichinger.) (xiv, 1895).....                                                                                   | 476                      |
| Quercetin and its Derivatives. (Herzig.) (viii, 1889).....                                                                 | 770; (x, 1891), 913, 913 |
| Quinaldine, By-Products of. (Döbner and Von Müller.) (v, 1886).....                                                        | 238                      |
| Quinazolin, Formation of, from Alizarin. (Graebe.) (x, 1891).....                                                          | 355                      |
| Quinoline and Pyridine Compounds. (iii, 1884).....                                                                         | 566                      |
| Quinoline and Quinaldine. (Friedländer and Göhring.) (iii, 1884).....                                                      | 245                      |
| Quinoline Compounds, Prod. of. (Perkin.) (iv, 1885).....                                                                   | 436                      |
| Quinoline Derivatives from Orthonitrobenzylmalonic Ether. (Bischoff.) (viii, 1889).....                                    | 769                      |
| Quinoline Derivatives, Synthesis of. (Knorr.) (iii, 1884).....                                                             | 319                      |
| Quinoline, Preparation of. (Walter.) (xiii, 1894).....                                                                     | 708                      |
| Quinoline, Reactions of. (Weidel and Bamberger.) (vii, 1888).....                                                          | 315                      |
| Quinoline, Red. (Hoffman.) (vi, 1887).....                                                                                 | 284                      |
| Quinolinedioximes. (Kostanecki and Reicher.) (x, 1891).....                                                                | 356                      |
| Quinone Derivatives, Conversion of Para- into Ortho-. (Hooker.) (xii, 1893).....                                           | 141                      |
| Quinone, Some Derivatives of. (Nietzki.) (iii, 1884).....                                                                  | 164                      |
| Quinones, Action of, on Anilines and Nitroparatoluidine. (Leicester.) (ix, 1890).....                                      | 1029                     |
| Quinones, Formation of, from Paramethylated Anilines. (Noeltling and Baumann.) (iv, 1885).....                             | 398, 489                 |
| Quinones, Secondary and Tertiary. (Nietzki and Kehrman.) (vi, 1887).....                                                   | 435                      |
| Quinone-Imides and Amido Quinones. (Kehrmann.) (ix, 1890).....                                                             | 603                      |

| Sulphonic Acids of the Fuchsin. (Prud'homme.) (xiv, 1895).....                                                                    | 860                |
| Sulphonic Acids, Oxidation Compounds of Amidonaphthol. (Reverdin and de la Harpe.) (xi, 1892).....                                | 997                |
| Sulphonic Acids, Prep. of New, for Manuf. Col. Mat. (P) The Clayton Aniline Co. and Dreyfus. (ix, 1890).....                      | 853                |
| Sulphonic Acids, Production of. (P) Oehler. (i, 1882).....                                                                        | 498                |
| Sulphonic Acids, Production of Various. (P) Kalle and Co. (i, 1882).....                                                          | 498                |
| Sulphonic Derivatives, Transformation of. (Istrati.) (viii, 1889).....                                                            | 876                |
| Sulphophenylazotetrahydro- $\alpha$ -naphthoquinoline. (Bamberger and Stettenheimer.) (xi, 1892).....                             | 24                 |
| Sulphophthalic Acid, Note on $\beta$ -. (Graebe.) (iv, 1885).....                                                                 | 397                |
| Sulphur Dioxide and Sodium Phenylate, Reactions of Addition-Product of. (Schall and Uhl.) (xi, 1892).....                         | 900                |
| Tannin Orange. (Schoen.) (xiii, 1894).....                                                                                        | 1189               |
| Tar-Colours, Spectroscopical Investigation of. (Schoop.) (vi, 1887).....                                                          | 137                |
| Tartrazines, Formation of the. (Ziegler and Locher.) (vi, 1887).....                                                              | 593                |
| Tetrabromofluorescein, Manuf. of. (Mühlhauser.) (xi, 1892).....                                                                   | 673                |
| Tetrahydro- $\alpha$ -Naphthoquinoline. (Bamberger and Stettenheimer.) (xi, 1892).....                                            | 23                 |
| Tetrahydro- $\alpha$ -Naphthylamine. (Bamberger and Bordt.) (viii, 1889).....                                                     | 387                |
| Tetrahydro- $\beta$ -Naphthol, Aromatic. (Bamberger and Kitschelt.) (ix, 1890).....                                               | 603                |
| Tetrahydro- $\beta$ -Naphthylamine, Alicyclic and Aromatic. (Bamberger and Kitschelt.) (ix, 1890).....                            | 602                |
| Tetrahydroethoxyquinoline, Production of Derivatives of. (P) Fischer. (ii, 1883).....                                             | 244                |
| Tetrahydroethoxyquinoline, Derivatives of. (P) Fischer. (ii, 1883).....                                                           | 244                |
| Tetrahydronaphthol, Alicyclic $\beta$ -. (Bamberger and Lodter.) (ix, 1890).....                                                  | 493                |
| Tetrahydronaphthol, Aromatic $\alpha$ -. (Bamberger and Bordt.) (ix, 1890).....                                                   | 493                |
| Tetrahydro- $\alpha$ -Orthamidquinoline. (Bamberger and Wulz.) (x, 1891).....                                                     | 999                |
| Tetrahydro-Oxyquinoline, Derivatives of. (P) Fischer. (ii, 1883).....                                                             | 244                |
| Tetrahydroquinoline, Homologues of. (Bamberger and Wulz.) (x, 1891).....                                                          | 999                |
| Tetramethylbenzene, Synthesis of. (Jacobsen.) (viii, 1889).....                                                                   | 113                |
| Tetramethylbenzidine and its Derivatives. (von Perger and Ulzer.) (ix, 1890).....                                                 | 1030               |
| Tetramethyldiamidobenzylidene, Preparation of. (Weil.) (xiv, 1895).....                                                           | 961                |
| Tetramethyldiamidobenzophenone, Derivatives and Reactions of. (Nathansohn and Müller.) (viii, 1889).....                          | 978                |
| Tetramethyldiamidobenzophenone, Preparation of Halogen Derivatives of. (P) Johnson. From Caro. (ix, 1885).....                    | 204                |
| Tetramethyldiamidodiphenylcarbinol. (Weil.) (xiv, 1895).....                                                                      | 475                |
| Tetramethyldiamidodiphenylcarbinol, Instability of. (Rosestiehl.) (xiv, 1895).....                                                | 1041               |
| Tetramethyldiamidodiphenylmethane. (Pinnow.) (xiv, 1895).....                                                                     | 474                |
| Tetramethyldiamidodiphenylmethane. (Baiter.) (vi, 1887).....                                                                      | 660                |
| Tetramidobenzene, Symmetrical. (Nietzki and Müller.) (viii, 1889).....                                                            | 385                |
| Tetra-nitro-Anthra-Chrysone, Manufacture of. (P) Imray. From The Farbwerke vormals Meister, Lucius, and Brüning. (xii, 1893)..... | 1022               |
| Tetraphenylthiophen, Synthesis of. (Ziegler.) (ix, 1890).....                                                                     | 1026               |
| Tetrazo Colours, Manufacture of Bordeaux-Red. (P) Farbwerke vormals Meister, Lucius, and Brüning. (ii, 1883).....                 | 243                |

| (P) McLea and Funshon. (vii, 1888) .....                                                                  | 573  |
| (P) Wilson. (vii, 1888) .....                                                                             | 320  |
| For Waterproofing Walls, Roofs, &c. (P) Cliffe. (viii, 1889) .....                                        | 835  |
| Heat Non-Conducting. (P) Birbeck. From Michell. (xii, 1893) .....                                         | 286  |
| Manuf. of, as Substitute for Silk. (P) Du Vivier. (ix, 1890) .....                                        | 291  |
| Or Varnish, for Protection of Tanks, Ships, &c. from Action of Petroleum. (P) Andrews. (viii, 1889) ..... | 291  |
| Plastic, as a Substitute for Celluloid. (P) Eckstein. (ix, 1890) .....                                    | 954  |
| Plastic, Manufacture of a New. (P) Menzies. (xi, 1892) .....                                              | 697  |
| Preservative, for Stone, &c. (P) Clerly. (xii, 1893) .....                                                | 1037 |
| Waterproofing, for Stone, &c. (P) Sinclair and Mackay. (x, 1891) .....                                    | 374  |
| Compositions and Apparatus for Coating Metal Structures. (P) Wailes and Doye. (viii, 1889) .....          | 291  |
| For Cleaning and Polishing. (P) Ashley. (viii, 1889) .....                                                | 407  |
| For Cleansing. (P) Stone. (ix, 1890) .....                                                                | 219  |
| For Coating Submerged Surfaces:                                                                           |      |
| (P) Day. (xi, 1892) .....                                                                                 | 694  |
| (P) Wallace and Ward. (vii, 1888) .....                                                                   | 443  |
| For Manufacture of Pottery. (P) Tompkinson. (xii, 1893) .....                                             | 691  |
| For Moulding or Turning. (P) Lake. From Todd. (vi, 1887) .....                                            | 550  |
| For Preparing and Coating Fabrics. (P) Heyde. (ix, 1890) .....                                            | 304  |
| For Preserving Liquids. (P) Pickles. (xiii, 1894) .....                                                   | 1083 |
| For Renovating Plush, &c. (P) Thompson. From Mautner. (x, 1891) .....                                     | 923  |
| For Self-Lubricating Bearings. (P) Inray. From Newell. (xii, 1893) .....                                  | 586  |
| For Steam Boilers. (P) Clayton. (xii, 1893) .....                                                         | 661  |
| For Treatment of Sewage. (P) Burghardt. (xiii, 1894) .....                                                | 832  |
| Leather. (P) Tuteur and Goulborne. (vii, 1888) .....                                                      | 220  |
| Non-Conducting. (P) Stanford. (v, 1886) .....                                                             | 100  |
| Non-Corrosive and Anti-Fouling. (P) Davison. (vii, 1888) .....                                            | 854  |
| Self-Lubricating, for Bearings, &c. (P) Holmes. (ix, 1890) .....                                          | 801  |
| Compound, a Buoyant, and Water-tight Case for. (P) Wood. (viii, 1889) .....                               | 625  |
| Anti-Corrosive, Manufacture of. (P) Fulton. From Schmid. (ix, 1890) .....                                 | 814  |
| Antiseptic, for Perishable Articles. (P) Daniels. (viii, 1889) .....                                      | 411  |
| Bodies, Apparatus for Composing. (P) Lorrain. (v, 1886) .....                                             | 615  |
| Electric Insulating:                                                                                      |      |
| (P) Baurnhielm and Jermander. (xiii, 1894) .....                                                          | 531  |
| (P) Gutzsch and others. (xii, 1893) .....                                                                 | 848  |

## Compound—cont.

| Compound—cont.                                                                                                 | PAGE               |
|----------------------------------------------------------------------------------------------------------------|--------------------|
| For Alimentary and Medicinal Purposes. (P) Abel. From Boehringer. (xii, 1893) .....                            | 370                |
| For Carburising Metals. (P) Brown. (xi, 1892) .....                                                            | 616                |
| For Cleansing and Bleaching Fabrics. (P) Parker. (ix, 1890) .....                                              | 174                |
| For Cleansing Fabrics, &c. (P) Hodekinson. (vi, 1887) .....                                                    | 727                |
| For Coating Ships' Bottoms. (P) Seabrook. (viii, 1889) .....                                                   | 468                |
| For Coating Walls. (P) Norwood. (xi, 1892) .....                                                               | 606                |
| For Covering Electric Wires. (P) Merritt. (vi, 1887) .....                                                     | 558                |
| For Electric Insulating. (P) Sinclair and Mackay. (x, 1891) .....                                              | 706                |
| For Extinguishing Fires, Liquid. (P) Abel. From Neveu. (ii, 1883) .....                                        | 541                |
| For Generating Carbon Dioxide, &c. (P) Grimshaw. (x, 1891) .....                                               | 253                |
| For Insulating, &c. (P) Banks. (xi, 1892) .....                                                                | 927                |
| For Manufacturing Moulded Articles. (P) Lake. From Lee. (viii, 1889) .....                                     | 781                |
| For Plastering. (P) Hitchins. (vi, 1887) .....                                                                 | 510                |
| For Polishing Metals and Glass. (P) Bietski. (x, 1891) .....                                                   | 263                |
| For Preparing Starch or Flour Size. (P) Waite. (vi, 1887) .....                                                | 375                |
| For Preventing and Removing Boiler Incrustation. (P) Wade. (vi, 1887) .....                                    | 39                 |
| For Preventing Pores in Metals. (P) Burger and Mannheimer. (x, 1891) .....                                     | 775                |
| For Producing Designs on Fabrics. (P) Lake. From Whitefield. (vi, 1887) .....                                  | 508                |
| For Protecting Iron and Steel. (P) Lehmann. (xii, 1893) .....                                                  | 364                |
| For Purification of Sewage. (P) Chinnock and others. (xii, 1893) .....                                         | 617                |
| For Removing Boiler Incrustation:                                                                              |                    |
| (P) van Look. (viii, 1889) .....                                                                               | 971                |
| (P) Wade. (x, 1891) .....                                                                                      | 240                |
| For Removing Paint:                                                                                            |                    |
| (P) Brentini. (viii, 1889) .....                                                                               | 716                |
| (P) Oates. (viii, 1889) .....                                                                                  | 552                |
| (P) Tessen. (xiii, 1894) .....                                                                                 | 1209               |
| For Removing Varnish. (P) Oates. (viii, 1889) .....                                                            | 552                |
| For Scouring Textiles, Detergent. (P) Brothers. (xiii, 1894) .....                                             | 260                |
| For Silver Plating. (P) Culley. (xii, 1893) .....                                                              | 767                |
| For Treating Fuel. (P) Lake. From The Standard Coal and Fuel Company. (x, 1891) .....                          | 246, 246, 246, 825 |
| For Use as Paint. (P) Condy. (ix, 1890) .....                                                                  | 814                |
| For Use in Manufacture of Matches. (P) Priester. (xiii, 1894) .....                                            | 661                |
| For Use in Manufacture of Paper. (P) Applegarth. (x, 1891) .....                                               | 268                |
| For Washing, &c. (P) Lake. From Castellani. (xii, 1893) .....                                                  | 352                |
| For Welding, Tempering, &c., Metals. (P) Fisher. From Lord. (viii, 1889) .....                                 | 898                |
| Medicinal and Nutritive. (P) Clowes. (xiv, 1895) .....                                                         | 982                |
| Metallic, for Flooring, Paving, &c. (P) Wilkes and Millar. (iv, 1885) .....                                    | 675                |
| Of Antipyrine and Iodine, Manufacture of. (P) Inray. From The Farb. vorm. Meister and others. (x, 1891) .....  | 1028               |
| Plastic, Manufacture of a. (P) Rifter von Pischhof. (xiv, 1895) .....                                          | 495                |
| Production of a Cleansing. (P) Schicht. (xii, 1893) .....                                                      | 1044               |
| Production of a Washing. (P) Waddell. (x, 1891) .....                                                          | 1015               |
| Resistant, for Battery-Room Floors, &c. (P) Crompton and Jenkinson. (ix, 1890) .....                           | 1038               |
| Resulting from Reaction of a Methyl-phenyl-hydrazine and Salicylaldehyde. (P) Roos. (xii, 1893) .....          | 289                |
| Compounds:                                                                                                     |                    |
| Anti-Corrosive and Anti-Fouling. (P) Dejonge. (x, 1891) .....                                                  | 557                |
| Anti-Fouling, for Ships' Bottoms. (P) Dejonge. (x, 1891) .....                                                 | 1017               |
| Antiseptic Washing. (P) Ascoug. (viii, 1889) .....                                                             | 991                |
| Apparatus for Decomposing Chemical:                                                                            |                    |
| (P) Adams. (viii, 1889) .....                                                                                  | 989, 989           |
| (P) Lake. From Peck. (viii, 1889) .....                                                                        | 868                |
| Artificial Medicinal. (viii, 1889) .....                                                                       | 1004               |
| Carbonaceous. (P) Acheson. (xii, 1893) .....                                                                   | 847                |
| Cleaning, Manuf. of. (P) Fisher and McLay. (ix, 1890) .....                                                    | 814                |
| Colour-Reactions of Organic. (Nickel.) (viii, 1889) .....                                                      | 821                |
| Detergent, containing Ammonia. (P) Thompson. From Parsons. (viii, 1889) .....                                  | 403                |
| Digestive. (P) Carmick. (xiv, 1895) .....                                                                      | 885                |
| Electric Insulating. (P) Williams. (ix, 1890) .....                                                            | 743                |
| Explosive. (P) Newton. From Nobel. (viii, 1889) .....                                                          | 725                |
| For Alimentary and Medicinal Purposes. (P) Johnson. From Boehringer and Soehne. (xiii, 1894) .....             | 759                |
| For Chemical Tanning. (P) Gerson. (vii, 1888) .....                                                            | 683                |
| For Coating Sulphuric Acid Distillation Vessels. (P) Walters. (i, 1882) .....                                  | 26                 |
| For Destroying Insects on Plants and Animals, and for use as Soaps. (P) Kingzett. (v, 1886) .....              | 102, 102, 102      |
| For Dyeing, Manufacture of. (P) Inray. From The Farbwerke vorm. Meister, Lucius, and Bruning. (ix, 1890) ..... | 854                |
| For Embalming Purposes. (P) Thompson. From Bate and others. (ix, 1890) .....                                   | 1059               |
| For Lubricating. (P) Morgan. (ix, 1890) .....                                                                  | 299                |
| For Making Bread, &c. (P) Preston. (xii, 1893) .....                                                           | 704                |
| For Manufacture of Fermented Beverages. (P) Heron. (xiii, 1894) .....                                          | 1082               |
| For Precipitating Sewage. (P) Levinstein. (xiii, 1894) .....                                                   | 1216               |
| For Vulcanising Rubber. (P) Fawcett. (x, 1891) .....                                                           | 1016               |
| For Waterproofing Leather. (P) Lewis. (xiii, 1894) .....                                                       | 532, 532           |
| Glazing, Antiseptic, and Washing, Manufacture of. (P) Ascoug. (ix, 1890) .....                                 | 68                 |

Compounds—*cont.*

|                                                                                                                      |          |
|----------------------------------------------------------------------------------------------------------------------|----------|
| Medicinal, Production of. (P) Johnson. From von Heyden. (x, 1891).....                                               | 1027     |
| Metallic, Manufacture of. (P) de Pass. From Thiochrm. (xiii, 1894).....                                              | 158      |
| Metallic, Prod. of. (P) Sinclair and Smith. (viii, 1889)....                                                         | 339      |
| Of Hydrogen Cyanide with Anilides of the Sugars. (Miller, Plochl, and Strauss.) (xiii, 1894).....                    | 767      |
| Of Metals and Sulphur, Electrolytic Decomposition of. (P) Abel and Murray. From Siemens and Halske. (xii, 1893)..... | 847      |
| Of Metals and Sulphur, Treatment of. (P) Lewis and Gelstharp. (xii, 1893).....                                       | 842      |
| Of Sugars with Polyhydric Phenols. (Fischer and Jennings.) (xiii, 1894).....                                         | 765      |
| Of the Citral Group. (Tiemann and Semmler.) (xiii, 1894).....                                                        | 417      |
| Of the Quinine Alkaloids. (Hesse.) (viii, 1889).....                                                                 | 721      |
| Of Weak Acid Character, Relative Strengths of. (Shields.) (xii, 1893).....                                           | 632      |
| Oleaginous or Synoumeous, for Producing Medicinal Emulsions or Disinfectants. (P) Klever. (xiii, 1894).....          | 754      |
| Pharmaceutical, Production of. (P) Willcox. From The Farbenfabriken vormals Bayer and Co. (xii, 1893)....            | 289      |
| Plastic:                                                                                                             |          |
| (P) Gooklen. (v, 1886).....                                                                                          | 172      |
| (P) Justice. From Gravelin. (viii, 1889).....                                                                        | 625      |
| Plastic, Manufacture of, and Apparatus therefor. (P) de Vasson and The Soc. dite "La Suberine." (x, 1891).....       | 771      |
| Relation between Chemical Composition and Absorption Spectra of Organic. (Althausse and Krüss.) (vii, 1889).....     | 1012     |
| Relation between Composition and Colour of. (Schulze.) (xi, 1892).....                                               | 867      |
| Sanitary and Antiseptic. (P) Hannan. (viii, 1889).....                                                               | 1001     |
| Separating Constituents of Gaseous and Liquid. (P) Windhausen. (xii, 1893).....                                      | 741      |
| Vulcanised Plastic. (P) Boulit. From Kiel. (viii, 1889)....                                                          | 204      |
| Vulcanised Plastic, Manufacture of. (P) Boulit. From Kiel. (ix, 1890).....                                           | 398, 954 |
| Compressing App. for Gases. (P) Pullian and Lane. (xii, 1893).....                                                   | 28       |
| Compression and Exhaustion Apparatus, Combined. (Gawalski.) (iv, 1885).....                                          | 757      |
| Apparatus for Determining. (P) Schickert. (i, 1882).....                                                             | 359      |
| Apparatus for Testing Materials in. (Bonaomi.) (ix, 1890).....                                                       | 215      |
| Compressors, Air. (P) Johnson and Hutchinson. (xi, 1892).....                                                        | 933      |
| Use of Oil in Ammonia-Gas. (von Strombeck.) (xi, 1892).....                                                          | 733      |
| Concentrates, Treatment of Pyrites by Cyanide. (Crosce.) (xiv, 1895).....                                            | 753      |
| Concentrating Apparatus:                                                                                             |          |
| (P) Alliott. (iv, 1885).....                                                                                         | 196      |
| (P) Atterbury and Ewens. (xii, 1893).....                                                                            | 764      |
| (P) Croll. (vi, 1887).....                                                                                           | 823      |

| Electrolytic Estimation of:                                                                                     |          |
| (Macintosh.) (i, 1882).....                                                                                     | 118      |
| (Ross.) (xii, 1893).....                                                                                        | 551      |
| Electrolytic Extraction of. (P) Marchese. (iv, 1885).....                                                       | 600      |
| Electrolytic Extraction of, and Apparatus therefor. (P) Liepmann. (vii, 1888).....                              | 217      |
| Electrolytic Production of. (P) Perreux-Lloyd. (xii, 1893).....                                                 | 453      |
| Electrolytic Reduction of, by Hopfner's Process. (Jensch.) (xiv, 1895).....                                     | 279      |
| Electrolytic Refining of. (xi, 1892).....                                                                       | 824      |
| (Badd.) (xi, 1892).....                                                                                         | 926      |
| Electrolytic Separation of, from Arsenic, Tin, and Antimony. (Schmucker.) (xiii, 1894).....                     | 286      |
| Electrolytic Separation of, from Silver and Cadmium. (Smith and Frankel.) (ix, 1890).....                       | 656      |
| Electrolytic Separation of Mercury from. (Smith and McCauley.) (xi, 1892).....                                  | 181      |
| Electrolytically Refining, Method and Apparatus for. (P) Elmore and Barrett. (vi, 1887).....                    | 140      |
| Electro-metallurgy of. (Swinburne.) (xi, 1892).....                                                             | 824      |
| Estimation of. (Kohn.) (x, 1891).....                                                                           | 328      |
| Estimation of, as Copper Sub-Sulphide. (Wegscheider.) (xii, 1894).....                                          | 67       |
| Estimation of, by Converting Copper Sulphide into Oxide. (Holthof.) (ix, 1890).....                             | 416      |
| Etching, Ferric Chloride for. (Weissenberger.) (ix, 1890).....                                                  | 892      |
| Examination of Commercial. (Lowe.) (ii, 1883).....                                                              | 180      |
| Exports of Chili. (T.R.) (x, 1891).....                                                                         | 75       |
| Extracting, from its Ore. (P) Groth. From Dahlerus. (iv, 1885).....                                             | 503      |
| Extracting, from Mixed Ores. (P) Cross and Wells. (iii, 1884).....                                              | 111      |
| Extracting Works, Utilising Waste Liquors from. (Jurisch.) (vii, 1888).....                                     | 124      |
| Extraction of. (Hunt and Douglas.) (ii, 1883).....                                                              | 134      |
| Extraction of, at Agordo. (Egleston.) (vii, 1888).....                                                          | 503      |
| Extraction of, from Ore, and Apparatus therefor. (P) Abel. From Siemens and Halske. (ix, 1890).....             | 396      |
| Extraction of, from Ores:                                                                                       |          |
| (P) Doetsch. (viii, 1889).....                                                                                  | 801      |
| (P) Nichols and others. (xi, 1892).....                                                                         | 443      |
| (P) Noad. (vi, 1887).....                                                                                       | 511      |
| Extraction of, from Pyrites. (P) Pinciro. (vii, 1888).....                                                      | 389      |
| Extraction of, from Roasted Pyrites. (Blattner and Kestner.) (xii, 1893).....                                   | 925      |
| Extraction of Precious Metals from, and Apparatus therefor. (P) Haego and "The Cape Copper Co." (ix, 1890)..... | 1134     |
| Extractors, Recovery of Sulphate of Soda from Waste Liquors of. (Ellis.) (ii, 1884).....                        | 613      |
| Ferric Chloride Process for Estimation of Arsenic in. (Platten.) (xiii, 1894).....                              | 324      |
| Ferrocyanide. (Rauter.) (xiv, 1895).....                                                                        | 833      |
| Flux for Welding. (P) Chandler. (viii, 1889).....                                                               | 802      |
| Foreign Elements in, Determined. (Fresenius.) (i, 1882).....                                                    | 340      |
| Foreign Metals in, Determining. (Hampe.) (xiii, 1894).....                                                      | 421      |
| Freeing, from Arsenic. (P) Stone. (xii, 1893).....                                                              | 524      |
| From Cupreous Pyrites, Obtaining. (P) Hargreaves and Robinson. (vii, 1888).....                                 | 217      |
| From Cupreous Solutions. (P) Price. (iii, 1884).....                                                            | 524      |
| From Matte, Obtaining. (P) Verel and Stewart. (iv, 1885).....                                                   | 352      |
| From Ores, Obtaining. (x, 1891).....                                                                            | 469      |
| (P) French and Stewart. (xi, 1892).....                                                                         | 612      |
| From Ores, Siemens' Process for Extraction of. (xi, 1892).....                                                  | 534      |
| From Poor Ores, Obtaining. (Symons.) (iv, 1885).....                                                            | 404      |
| From Solutions, Obtaining. (P) Hunt. From Thomson. (vi, 1887).....                                              | 516      |
| Furnace and Process for Refining and Smelting. (P) Vicuna. (xiii, 1894).....                                    | 644      |
| Furnace for Obtaining Crude, from its Ore. (P) Clark. (vii, 1888).....                                          | 225      |
| From Garnier. (iv, 1885).....                                                                                   | 512      |
| Furnaces, Lining for. (P) Tucker. (vi, 1887).....                                                               | 539      |
| Glance, Oxidation of. (Smith and Wallace.) (x, 1891).....                                                       | 1037     |
| Gold and Silver in, Estimation of. (Smith.) (xiv, 1895).....                                                    | 890      |
| Hunt, Douglas, and Haunch's Method of Extracting. (Stahl.) (x, 1891).....                                       | 468      |
| Hydrate, A New. (Le Duc.) (xi, 1892).....                                                                       | 269      |
| Hydrate, Properties of Ammoniacal. (Prud'homme.) (xi, 1892).....                                                | 427      |
| Hydrated Oxide of. (Lowe.) (ii, 1883).....                                                                      | 388      |
| Hygienic Relation of, to Preserved Food. (Lehmann and Mayrhofer.) (xii, 1893).....                              | 473      |
| Imports of Metallic, into Canada. (T.R.) (xii, 1893).....                                                       | 958      |
| In Australia. (T.R.) (xii, 1893).....                                                                           | 337      |
| In Canada. (T.R.) (ix, 1890).....                                                                               | 316      |
| In Chili. (T.R.) (viii, 1889).....                                                                              | 316      |
| In Coal and Coke. (Platz.) (vi, 1887).....                                                                      | 751      |

| Dextrinase and Maltase, Diastase a Mixture of. (Wijsman, junr.) (ix, 1890).....                                                                                 | 752      | Diamine-Black, Ingrain-Black from. (Baldensperger.) (x, 1891).....                                       | 762      |
| Dextro-Licureol. (Barbier.) (xii, 1893).....                                                                                                                    | 783      | Black, R., Dyeing with. (ix, 1890).....                                                                  | 1126     |
| Dextrose. (Ergw and Koenigs.) (viii, 1889).....                                                                                                                 | 904      | Diamines, Action of Aromatic, on Carbohydrates. (Griess and Harrow.) (vi, 1887).....                     | 446      |
| Action of Ammonia on. (Stoue.) (xiv, 1895).....                                                                                                                 | 589, 673 | And Monamines, Simultaneous Oxidation of. (Bindschedler.) (ii, 1883).....                                | 270      |
| Action of Dilute Acids on. (Conrad and Guthzeit.) (v, 1886).....                                                                                                | 673      | Nitroso Derivatives of Aromatic. (Witt.) (iv, 1885).....                                                 | 396      |
| Action of Sodium Hydrate on. (Urech.) (iii, 1884).....                                                                                                          | 452      | Diamond Black, Dyeing. (Farbenfabriken vormals Bayer and Co.) (ix, 1890).....                            | 937      |
| Analyses of Honey containing. (Anthon.) (vii, 1888).....                                                                                                        | 136      | Black, Dyeing with. (ix, 1890).....                                                                      | 1126     |
| And Levulose, Apparent Proportion between, in Malaga Wine. (Borntrager.) (xi, 1892).....                                                                        | 766      | Diamonds, Optical Instrument for Detection of Imitation. (P) Thorpe. (xiv, 1895).....                    | 886      |
| And Maltose, (Degener.) (vi, 1887).....                                                                                                                         | 828      | Dianilidoquinone-anil, Synthesis of. (Baudrowski.) (vii, 1888).....                                      | 562      |
| Cause of Biotation of. (Tollens.) (xii, 1894).....                                                                                                              | 165      | Dianisidine Blue Discharge on Paranitraniline Red. (Bloch and Schwarz.) (xiv, 1895).....                 | 481      |
| Circular Polarization of. (Tollens.) (iv, 1885).....                                                                                                            | 132      | Condensation Products of Formic Aldehyde with. (P) Abel. From Durand and Co. (xii, 1893).....            | 674      |
| Decomposition of. (Frankland and Lumsden.) (xi, 1892).....                                                                                                      | 449      | Dianthranilic Acid, Preparation of Indigo from Ethylene. (Frankel and Spiro.) (xiv, 1895).....           | 860      |
| Determination of, in Mixture. (Wiechmann.) (xii, 1893).....                                                                                                     | 629      | Dianthryl, Prep. of. (Liebmann and Gimbel.) (vi, 1887).....                                              | 653      |
| Estimation of, as Phenylglucosazone. (Lintner and Krobner.) (xiv, 1895).....                                                                                    | 690      | Diaphragms for Electrolytic App. (P) Breuer. (xi, 1892).....                                             | 927      |
| Estimation of, by Fehling's Solution. (Kusserow.) (xiv, 1895).....                                                                                              | 1072     | Resistance of Porous. (Kruger.) (xiv, 1895).....                                                         | 873      |
| Fermentation of. (Tale.) (xii, 1894).....                                                                                                                       | 268      | Diaphthol or Quinaseptol. (Guinard.) (xiii, 1894).....                                                   | 903      |
| Formation of, from Starch. (Lintner.) (xi, 1892).....                                                                                                           | 1021     | Diastase:                                                                                                |          |
| Formation of Mannite from. (Dafert.) (iii, 1884).....                                                                                                           | 187      | (Lintner.) (vi, 1887).....                                                                               | 296      |
| From Cane Sugar, Specific Rotatory and Cupric Reducing Power of. (O'Sullivan.) (xi, 1892).....                                                                  | 372      | (Low.) (vi, 1887).....                                                                                   | 447      |
| Influence of Inactive Bodies on Rotatory Power of. (Wender.) (x, 1891).....                                                                                     | 559      | (Szillágyi.) (x, 1891).....                                                                              | 474      |
| Manufacture of:                                                                                                                                                 |          | Action of. (Lefmann and Beam.) (vii, 1888).....                                                          | 582      |
| (Vierneisel, Trobach and Cards.) (vi, 1887).....                                                                                                                | 602      | Action of Maltose in Presence of, during Saccharification. (Lindet.) (viii, 1889).....                   | 811      |
| (Wagner.) (vi, 1887).....                                                                                                                                       | 602      | Action of, on Cold Starch Paste. (Brown and Morris.) (xiv, 1895).....                                    | 288      |
| Methylene Blue as a Test for, in Beet Sugar. (Ihl.) (vii, 1888).....                                                                                            | 347      | Action of, on Isomaltose. (Lintner.) (xiv, 1895).....                                                    | 54       |
| Optical Isomers of. (Fischer.) (ix, 1890).....                                                                                                                  | 1052     | Action of, on Starch. (Ling and Baker.) (xiv, 1895).....                                                 | 175      |
| Oxidation of, by Red Oxide of Mercury and Baryta Water. (vi, 1887).....                                                                                         | 554      | Action of, on Ungelatinised Starch. (Lintner.) (ix, 1890).....                                           | 402      |
| Preparation of, from Sulphite Cellulose. (Lindsey and Tollens.) (xi, 1892).....                                                                                 | 835      | Artificial. (Reyher.) (viii, 1889).....                                                                  | 407      |
| Production of. (P) Rumpfer. (xi, 1892).....                                                                                                                     | 1019     | Chemical Conditions which Influence Action of. (Eiffont.) (xii, 1893).....                               | 368, 851 |
| Prod. of Volatile Fatty Acids from. (Loew.) (ix, 1890).....                                                                                                     | 637      | Degradation of Starch by Action of. (Lintner and Düll.) (xii, 1894).....                                 | 53       |
| Ratio of, to Levulose in Sweet Wine, &c. (Konig and Karsch.) (xiv, 1895).....                                                                                   | 773      | In "Casse" Wines. (Gouinard.) (xiv, 1895).....                                                           | 878      |
| Reduction of Copper Solution by. (Urech.) (iii, 1884).....                                                                                                      | 423      | Influence of, on Beer. (Windisch.) (xii, 1893).....                                                      | 368      |
| Solubility of Salts of Acetone in Solutions of. (King and McElroy.) (xii, 1893).....                                                                            | 176      | Mixture of Maltase, Dextrinase and. (Wijsman, junr.) (ix, 1890).....                                     | 752      |
| Diacetones, a New Class of. (Behal and Auger.) (ix, 1890).....                                                                                                  | 280      | Non-crystallisable Products of Action of, on Starch. (Schiffer.) (xii, 1893).....                        | 368      |
| Action of Diamines on. (Combes.) (viii, 1889).....                                                                                                              | 976      | Of Cereals. (Egaroff.) (xiii, 1894).....                                                                 | 1080     |
| Diacetosuccinic Ether, Action of, on Phenylhydrazine. (Knorr and Bülow.) (iv, 1885).....                                                                        | 61       | Prep. of, for Manuf. of Bread, &c. (P) Fletcher. (x, 1891).....                                          | 1020     |
| Diacetyl dihydroxyphenazine. (Fischer and Hepp.) (ix, 1890).....                                                                                                | 602      | Preservation of. (Lefmann and Beam.) (vii, 1889).....                                                    | 561      |
| Diacetyl oxanthranol. (Liebmann.) (vii, 1888).....                                                                                                              | 384      | Products of Action of, on Starch. (Brown and Morris.) (ix, 1885).....                                    | 682      |
| Diacipiperazine. Diphenyl- $\alpha$ - $\gamma$ , and $\alpha$ - $\delta$ . (Hausdorfer.) (viii, 1889).....                                                      | 978      | Reicher's Artificial. (Egaroff.) (xiii, 1894).....                                                       | 1080     |
| Diacipiperazines, $\alpha$ - $\beta$ , and Reactions in Formation of Piperazines. (Bischoff and Nastvogel.) (viii, 1889).....                                   | 978      | Researches on. (vii, 1888).....                                                                          | 397      |
| $\alpha$ , $\gamma$ . (Bischoff and Nastvogel.) (viii, 1889).....                                                                                               | 977      | Saccharification by:                                                                                     |          |
| Diagrams, Showing Percentages of Sucrose and Glucose in Cane Juice. (Alexander.) (v, 1886).....                                                                 | 147      | (Lindet.) (viii, 1889).....                                                                              | 470      |
| Dialyser, A New. (Bauer.) (vii, 1888).....                                                                                                                      | 231      | (Reyher.) (vii, 1889).....                                                                               | 470      |
| An Easily Constructed. (Huizinga.) (i, 1882).....                                                                                                               | 175      | Studies on. (Lintner and Eckhardt.) (ix, 1890).....                                                      | 91, 318  |
| Dialysis, Separation of Matters in Solution by. (P) Marx. (ix, 1890).....                                                                                       | 196      | Utilisation of Flours Rich in. (P) Briant and Walker. (xiii, 1894).....                                  | 55       |
| Diamide, Poisonous Character of. (Loew.) (ix, 1890).....                                                                                                        | 1146     | Diazo and Phenolic Group, Molecular Interchange Between. (Lefmann and Boye.) (ix, 1890).....             | 931      |
| Diamido Base and Colouring Matters therefrom, Manuf. of. (P) Imray. From Farbwerke vormals Meister, Lucius, and Brüning. (xii, 1894).....                       | 384      | Compound, Prod. of a New. (P) Altschul. (xiv, 1895).....                                                 | 145      |
| Diamido Base and Tetrazo Colouring Matters therefrom, Manufacture of. (P) Thompson and Moore. (xii, 1894).....                                                  | 384      | Compounds. (Schraube and Schmidt.) (xiii, 1894).....                                                     | 508      |
| Diamido-acenaphthene. (Quincke.) (vii, 1888).....                                                                                                               | 382      | Compounds, Action of Alcohol on. (Reimsen.) (ix, 1885).....                                              | 275      |
| Diamido-anisol Hydrochloride, <i>m-p</i> . (Hähle.) (x, 1891).....                                                                                              | 692      | Compounds, Rate of Decomposition of. (Hausser and Müller.) (xi, 1892).....                               | 672      |
| Diamidoazobenzidines, Transformation of, into Tetrazo Compounds. (P) Paul. (vii, 1888).....                                                                     | 432      | Compounds, Researches on:                                                                                |          |
| Diamidobenzophenonamine Chlorides, Production and Conversion of Alkylised. (P) Imray. From The Farbwerke vormals Meister, Lucius, and Brüning. (vii, 1888)..... | 205      | (Gattermann.) (ix, 1890).....                                                                            | 823      |
| Diamidobenzophenones. (Wichelhaus.) (viii, 1889).....                                                                                                           | 536      | (Griess.) (i, 1882).....                                                                                 | 21, 444  |
| Diamidodibenzylbenzidine, &c., Azo Colours from. (P) Bang. From Dahl and Co. (viii, 1889).....                                                                  | 611      | Compounds, Stability of, in Aqueous Solution. (Hirsch.) (x, 1891).....                                   | 535      |
| Diamidodiphenylpiperazine, Para-. (Lefmann and Schleich.) (viii, 1889).....                                                                                     | 699      | Compounds, Synthesis effected by. (Hirsch.) (x, 1891), 354; (xii, 1893).....                             | 137      |
| Diamidodisilyls, Prep. of. (Nolting and Stricker.) (viii, 1889).....                                                                                            | 114      | Diazoamidobenzene. (Fischer.) (iii, 1884).....                                                           | 370      |
| Diamidoethoxydiphenyl Sulphonic Acid, Colouring Matters from. (Feer.) (vii, 1888).....                                                                          | 839      | Action of Phenol upon. (Heumann and Oeconomides.) (vi, 1887).....                                        | 436      |
| Diamidogen, Manufacture of. (P) Johnson. From Badische Anilin und Soda Fabrik. (xi, 1892).....                                                                  | 370      | Diazoamidobenzoic Acid. (Noelting.) (xi, 1892).....                                                      | 343      |
| Diamidonaphthalene. (Griess.) (i, 1882).....                                                                                                                    | 445      | Diazo-amido Compounds, Constitution of. (Meldola and Streitfeld.) (vi, 1887), 283, 721; (vii, 1888)..... | 618      |
| Diamidonaphthalene-sulpho Acid, Production of. (P) Pitt. From Cassella and Co. (xiii, 1894).....                                                                | 244      | Compounds, Dry Decomposition of. (Heusler.) (x, 1891).....                                               | 71       |
| Diamidophenanthraquinone, Cotton Dyes from. (Litthauer.) (xii, 1893).....                                                                                       | 672      | Diazoamidodiphenyl- <i>o</i> -Disulphonic Acid. (Limpricht.) (x, 1891).....                              | 690      |
|                                                                                                                                                                 |          | Diazoazobenzenedisulphonic Acid. (Griess.) (i, 1882).....                                                | 445      |
|                                                                                                                                                                 |          | Diazobenzene and $\alpha$ - $\beta$ -Dianthrylamine, Combination of. (Matthes.) (ix, 1890).....          | 281      |

| Dibromocinchonine. (Comstock and Königs.) (iv, 1885) .....                                                                                  | 64   | Composition of. (Kilian.) (ix, 1890) .....                                                                                          | 820  |
| Dibromodinitrofluorescein. (Mühlhauser.) (vi, 1887) .....                                                                                   | 284  | Preparation of Pure. (Kilian.) (xiii, 1894) .....                                                                                   | 834  |
| Dibromodinitrodocumenol. (Auwers.) (v, 1886) .....                                                                                          | 27   | Dihydrochloride, Properties of a crystalline, derived from Eucalyptus Oil. (Anthoine.) (xii, 1893) .....                            | 462  |
| Dibromofluorescein. (Mühlhauser.) (vi, 1887) .....                                                                                          | 284  | Dihydrolutidine. (Gautier and Mourgues.) (ix, 1890) .....                                                                           | 648  |
| Dibromogallanilide, Blue Lakes Derived from. (Cazeneuve.) (xiii, 1894) .....                                                                | 1098 | Dihydroxybenzoic Acid, Production of Colouring Matters from. (P) Johnson. From The Badische Anilin und Soda Fabrik. (x, 1891) ..... | 759  |
| Dibromopendocumenol. (Auwers.) (v, 1886) .....                                                                                              | 27   | Dihydroxydiketotetrahydronaphthalene, Azines and Earholes from. (Zincke.) (xii, 1893) .....                                         | 671  |
| Dichlorothiophen, Direct Formation of. (Meyer and Stadler.) (iv, 1885) .....                                                                | 583  | Dihydroxydimethylanthraquinones, Isomeric. (Kostanecki and Nienmetschki.) (v, 1886) .....                                           | 25   |
| Dichlorether, Condensation of, with Cresols. (Bruckner.) (ix, 1890) .....                                                                   | 929  | Dihydroxydinaphthylsulphide. (Lange.) (vii, 1888) .....                                                                             | 341  |
| Dichloro- $\alpha$ -naphthoquinone Sulphonic Acid. (Claus and Van der Cloet.) (vii, 1888) .....                                             | 319  | Dihydroxydiphenylamine, Synthesis of. (Scyewitz.) (ix, 1890) .....                                                                  | 280  |
| Dichloronaphthalene, $\alpha$ - and $\beta$ -. (Widman.) (i, 1882) .....                                                                    | 443  | Dihydroxynaphthalene, A New. (Claus.) (viii, 1889) .....                                                                            | 535  |
| Dichloronaphthalenes, Derivatives of 1:3. (Clève.) (ix, 1890) .....                                                                         | 604  | Dihydroxynaphthalene-sulpho Acids, Manufacture of: (P) Johnson. From Badische Anilin und Soda Fabrik. (xiii, 1894) .....            | 942  |
| Dichloronaphthalenesulphonic Acid 1:6:4. (Clève.) (x, 1891) .....                                                                           | 1003 | (P) Wilcox. From Farbenfabriken vormals Bayer and Co. (xii, 1893) .....                                                             | 594  |
| Dichloronaphthoquinoneanilide. (Claus and Mielecke.) (v, 1886) .....                                                                        | 378  | Dihydroxyphenazine Hydrochloride. (Fischer and Hepp.) (ix, 1890) .....                                                              | 602  |
| Dichroines, Phenoxychroine, &c. (Brunner and Chuit.) (vii, 1888) .....                                                                      | 315  | Dihydroxyquinone, Action of, on Orthodiamines. (Nietzki and Hasterlik.) (x, 1891) .....                                             | 536  |
| Dicinchonine, Preparation of. (Hesse.) (iv, 1885) .....                                                                                     | 416  | Dihydroxyquinonephenazine. (Nietzki and Schmidt.) (vii, 1888) .....                                                                 | 384  |
| Dicotoin of Coto-Bark. (Cianicican and Silber.) (xiv, 1895) .....                                                                           | 884  | Dihydroxystearic Acid, Natural. (Juillard.) (xiv, 1895) .....                                                                       | 811  |
| Didier Generator. (Hunt.) (iii, 1884) .....                                                                                                 | 94   | Dihydroxystilbene, Diphenoltrichlorethane and <i>p</i> -. (Elhs and Hoerman.) (viii, 1889) .....                                    | 876  |
| Diehl's Apparatus for Fixing Colours in Cotton by Ammonia. (P) (iv, 1885) .....                                                             | 53   | Di-iodofluorescein. (Mühlhauser.) (vi, 1887) .....                                                                                  | 284  |
| Diethylbenzene, Meta-, Preparation of. (Voswinkel.) (viii, 1889) .....                                                                      | 114  | Di-iodoparaphenolsulphonic Acid or Soziodol. (vii, 1888) .....                                                                      | 586  |
| Diethylidenediamido-diphenylmethane Disulpho Acid, Manufacture of. (P) Geigy. (x, 1891) .....                                               | 1003 | Di-iodosalicylic Acid. (Mere.) (ix, 1890) .....                                                                                     | 544  |
| Diethylenediamine, Properties of. (Ladenburg.) (x, 1891) .....                                                                              | 788  | Diketones, Colour Reaction of Some. (Bamberger.) (iv, 1885) .....                                                                   | 370  |
| Diethylene-di-imine. (Ladenburg.) (x, 1891) .....                                                                                           | 381  | Dilution Tables for Practical Use. (Herz.) (ix, 1890) .....                                                                         | 412  |
| Diethylnecaprol, Manufacture of, and of a Sulphone therefrom. (P) Johnson. From The Farbenfabriken vormals Bayer and Co. (viii, 1889) ..... | 610  | Dimethylamidoazobenzene as an Indicator in Alkalimetry. (Fischer and Philipp.) (iv, 1885) .....                                     | 510  |
| Diethylnaphtholamine, Action of Sulphuric Acid upon, at High Temperatures. (Smith.) (i, 1882) .....                                         | 319  | Dimethylamidoquinoxazone. (Möhlau.) (xi, 1892) .....                                                                                | 673  |
| Diffusibility of Gases through Caoutchouc Membranes. (Reychler.) (xiii, 1894) .....                                                         | 181  | Dimethylaniline Acid, Sulphates of. (Vignon.) (vii, 1888) .....                                                                     | 744  |
| Diffusion Apparatus for Beetroot, Sugar Cane, &c. (P) Lake. From La Cie. de Fives-Lille. (vii, 1888) .....                                  | 129  | Action of Acetic Anhydride on. (Reverdin and de la Harpe.) (xi, 1892) .....                                                         | 778  |
| Battery, Combustible Gases arising from. (Dewald.) (xii, 1894) .....                                                                        | 749  | Action of, in Presence of Aluminium Chloride. (Giraud.) (viii, 1889) .....                                                          | 877  |
| Experiments in. (Herzfeld.) (viii, 1889) .....                                                                                              | 633  | Action of Sulphur on. (Möhlau and Krohn.) (vii, 1888) .....                                                                         | 203  |
| In Vacuo by Heckmann's Process. (Mugge.) (xiii, 1894) .....                                                                                 | 1210 | Alkyl-Hydroxy Derivatives of. (Grimaux.) (x, 1891) .....                                                                            | 458  |
| Juice, Advantages of Heating, with Steam. (Melichar.) (xiii, 1894) .....                                                                    | 653  | Azo Dyes From. (Bischoff.) (ix, 1890) .....                                                                                         | 932  |
| Juice, Defecation of, with Slaked Lime. (Mittelmann.) (xiii, 1894) .....                                                                    | 166  | Carboxyl Derivatives of. (Lauth.) (xiii, 1894) .....                                                                                | 629  |
| Juice, Filter for. (Bouvier.) (xiii, 1894) .....                                                                                            | 167  | Derivatives of. (Lauth.) (x, 1891) .....                                                                                            | 357  |
| Juice, Filtration of, after Heating. (xiii, 1894) .....                                                                                     | 749  | Manufacture of. (Schoop.) (vi, 1887) .....                                                                                          | 436  |
| Juice, Purification of. (Liedtke.) (xiii, 1894) .....                                                                                       | 749  | Nitration of. (Nöbling.) (v, 1886) .....                                                                                            | 376  |
| Liquor, Defecation and Filtration of. (Mittelmann.) (xiii, 1894) .....                                                                      | 965  | Ortho- and Parachloro-. (Heidberg.) (vi, 1887) .....                                                                                | 366  |
| Process in Java. (viii, 1889) .....                                                                                                         | 558  | Dimethylanilinemeraptide, Amido-, and Derivatives. (viii, 1889) .....                                                               | 454  |
| Report of Polish Committee on. (xiii, 1894) .....                                                                                           | 748  | Dimethylantracollol. (Birnkoff.) (vi, 1887) .....                                                                                   | 541  |
| Separation of Matters in Solution by. (P) Marx. (ix, 1890) .....                                                                            | 196  | Dimethylcolchic Acid. (Zeisel.) (vii, 1888) .....                                                                                   | 228  |

| Dinsmore Process, Chemistry of the. (Smith.) (ix, 1890)                                                                                                                                                                                           | 444      | Diquinoline, Pyrogenic Formation of. (Zimmermann and Müller.) (iii, 1884)                                    | 626      |
| Process for Manufacture of Coal Gas: (Carr.) (viii, 1889)                                                                                                                                                                                         | 960      | Diquinolyne Derivatives, Manufacture of. (P) Wilcox. From the Farbenfabriken vormals Bayer and Co. (x, 1891) | 383      |
| (Kraemar.) (x, 1891)                                                                                                                                                                                                                              | 685      | Diresorcinol. (Benedikt and Julius.) (iii, 1884)                                                             | 476      |
| Diospyros Kaki, L. f. (Hosie.) (xii, 1893)                                                                                                                                                                                                        | 770      | Detection of in Synthetical Phloroglucinol. (Herzig and Zeisel.) (ix, 1890)                                  | 900      |
| Dioxanthracene, Preparation of Azo Colouring Matters from. (P) Actien Gesellschaft für Anilin Fabrikation. (ii, 1883)                                                                                                                             | 274      | Diresorcinoltetrabenzoate. (Skraup.) (ix, 1890)                                                              | 410      |
| Preparation of Dyestuffs from. (i, 1882)                                                                                                                                                                                                          | 226      | Diresorcinolphthalin. (Benedikt and Julius.) (iii, 1884)                                                     | 476      |
| Dioxanthraquinone, Preparation of. (Schüler.) (i, 1882)                                                                                                                                                                                           | 401      | Disazo Compounds. (Nietzki and Diesterweg.) (vii, 1888)                                                      | 557      |
| Dioxydiphenylmethane, Colouring Matters Derived from. (P) Durand, Huguenin and D'Andrian. (xii, 1893), 756; (xiii, 1894), 145                                                                                                                     |          | Compounds derived from Phenylendiamine. (Wallach and Schulze.) (ii, 1883)                                    | 268      |
| Dioxynaphthalene, Manufacture of Sulpho-Acids of. (P) Wilcox. From The Farbenfabriken vormals Bayer and Co. (x, 1891)                                                                                                                             | 760      | Discharge and Resist Styles with Aniline black. (Dreyfus.) (xiii, 1894)                                      | 485      |
| Monosulpho Acid. (P) Bang. From Basle Chemical Works, Bindschedler. (xiii, 1894)                                                                                                                                                                  | 632      | For Dyes. Mordanted with Chromic Oxide. (Schmid.) (x, 1891)                                                  | 134      |
| Monosulpho Acid, Production of. (P) Bang. From Dahl. (x, 1891)                                                                                                                                                                                    | 131      | Of Indigo Blue. Chromic. (Scheurer.) (iv, 1885)                                                              | 493      |
| Monosulphonates, Production of Azo-Colouring Matters from. (P) Imray. From The Farbwerke vormals Meister, Lucius and Brüning. (ix, 1890)                                                                                                          | 803      | On Indigo, Producing White and Buff. (Geller.) (x, 1891)                                                     | 135      |
| Sulpho Acids, Manufacture of. (P) Wilcox. From Farbenfabriken vormals Bayer and Co. (xi, 1892)                                                                                                                                                    | 999      | Printing on Indigo Dyed Fabrics. (P) Imray. From Farbwerke vormals Meister, Lucius and Brüning. (xi, 1892)   | 160      |
| Treatment of. (Weber.) (i, 1882)                                                                                                                                                                                                                  | 100      | Discharges and Resists on Silk. (Koechlin.) (xiii, 1894)                                                     | 727      |
| Dioxynaphthoic-monosulpho Acid. (P) Imray. From Basle Chemical Works, Bindschedler. (xiii, 1894)                                                                                                                                                  | 632      | On Aniline Black. (Koechlin.) (xiii, 1894)                                                                   | 727      |
| Acid and its Salts, Production of. (P) Imray. From The Society of Chemical Industry in Basle. (xii, 1893)                                                                                                                                         | 597      | On Aniline Black Grounds, Coloured. (Kay.) (xiii, 1894)                                                      | 1193     |
| Dioxypyrenequinone, Preparation of. (P) Reinherz. (iv, 1885)                                                                                                                                                                                      | 488      | Weakening of Tissue in Printing white. (Scheurer.) (xi, 1892)                                                | 33       |
| Dioxytoluols. (Neville and Winther.) (ii, 1883)                                                                                                                                                                                                   | 167      | Discharger for Diffusion-Sieve. (P) Skala and Raulich. (i, 1882)                                             | 195      |
| Dip for Sheep. (P) Robertson. (xi, 1892)                                                                                                                                                                                                          | 365      | Dischargers for Sugar Filtering Apparatus. (P) Lake, from Mathieson. (v, 1886)                               | 330      |
| For Sheep, Colouring. (P) Reader. (xi, 1892)                                                                                                                                                                                                      | 541      | Discoveries and Inventions, Rewards for. (T.R.) (vii, 1888)                                                  | 782      |
| Pipes, Apparatus for Relieving Pressure in. (P) Linden. (ii, 1883)                                                                                                                                                                                | 264      | Discussion on Acid Tar Residues of Petroleum. (vii, 1888)                                                    | 376      |
| Diparatolylmetaphenylendiamine. (Hatschek and Zega.) (v, 1886)                                                                                                                                                                                    | 161      | On an Apparatus for Colour Tests. (vi, 1887)                                                                 | 94       |
| Diparatolylparaphenylendiamine. (Hatschek and Zega.) (v, 1886)                                                                                                                                                                                    | 161      | On Broxburn Petroleum. (vi, 1887)                                                                            | 362      |
| Diparaxylyl Ketone. (Elbs and Olberg.) (v, 1886)                                                                                                                                                                                                  | 320      | On Castner's Sodium Process. (vi, 1887)                                                                      | 247      |
| Dipentene. (Wallach.) (v, 1891)                                                                                                                                                                                                                   | 789, 851 | On Colchery Waters. (vii, 1888)                                                                              | 13       |
| Diphenol, Conversion of Phenol into. (Dianin.) (ii, 1883)                                                                                                                                                                                         | 237      | On Detection of Organic Bodies. (vi, 1887)                                                                   | 350      |
| Diphenol, <i>o</i> . (Limpricht.) (x, 1891)                                                                                                                                                                                                       | 601      | On Determination of Sulphur in Pyrites. (vi, 1887)                                                           | 345      |
| Production of Mixed Azo-Colours from the Ethers of. (P) Martius. (vi, 1887)                                                                                                                                                                       | 139      | On Electrolytic Bleaching. (vi, 1887)                                                                        | 246      |
| Diphenoltrichloroethane and <i>p</i> -Dihydroxystilbene. (Elbs and Hoermann.) (viii, 1889)                                                                                                                                                        | 876      | On English-grown Tobacco. (vi, 1887)                                                                         | 162      |
| Diphenyl, Amidodiphenylsulphonic Acid and Azo-Dyes from. (Carnelley and Schleselman.) (v, 1886)                                                                                                                                                   | 376      | On Estimating Iron. (vi, 1887)                                                                               | 352      |
| Diphenyl, Brominated Derivatives of. (Carnelley and Thomson.) (iv, 1885)                                                                                                                                                                          | 669      | On Estimating Moisture in Superphosphates. (vi, 1887)                                                        | 403      |
| Diphenyl Derivatives. (Täuber.) (ix, 1890)                                                                                                                                                                                                        | 600      | On Fixation of Nitrogen. (ix, 1890)                                                                          | 271      |
| Derivatives, Manufacture of. (P) Johnson. From The Badische Anilin und Soda Fabrik. (x, 1891)                                                                                                                                                     | 759      | On Flash Point, &c. of Mineral Oil. (xii, 1893)                                                              | 20, 21   |
| Occurrence of, in Coal-tar Oils. (Schulze.) (iii, 1884)                                                                                                                                                                                           | 409      | On Micro Organisms. (vi, 1887)                                                                               | 194      |
| Diphenyl- $\alpha$ - $\gamma$ -diacipiperazine, Homologues of. (Nastvogel.) (viii, 1889)                                                                                                                                                          | 977      | On Paraffin Scale Testing. (vi, 1887)                                                                        | 271, 351 |
| Diphenylamine, Acid Sulphate of. (Vignon.) (vii, 1888)                                                                                                                                                                                            | 744      | On Photochemical Estimation of Graded Tint. (vii, 1888)                                                      | 378      |
| Application of, in Qualitative Analysis. (Laar.) (ii, 1883)                                                                                                                                                                                       | 45       | On Pyrometers. (vi, 1887)                                                                                    | 14       |
| As Reagent for Detecting Free Chlorine. (Hager.) (iv, 1885)                                                                                                                                                                                       | 613      | On Raising Acids. (vi, 1887)                                                                                 | 248      |
| As Reagent for Nitrates and Nitrites. (Hager.) (iv, 1885)                                                                                                                                                                                         | 613      | On Starch, Archbold's reply to the. (vi, 1887)                                                               | 189      |
| Derivatives of. (Nietzki and Ernst.) (ix, 1890)                                                                                                                                                                                                   | 932      | On Supply of Pure Alcohol. (vii, 1888)                                                                       | 78       |
| From Phenol, Formation of Aniline and. (Merz and Müller.) (vi, 1887)                                                                                                                                                                              | 138      | On Tannin Estimation. (v, 1886)                                                                              | 210      |
| Orthentiro, and its Derivatives. (Schopff.) (ix, 1890)                                                                                                                                                                                            | 931      | On Technical Education in Chemistry. (viii, 1889)                                                            | 325      |
| Para-Nitroso. (Ikuta.) (vii, 1888)                                                                                                                                                                                                                | 318      | On the Rate at which Bleaching Powder Loses its Available Chlorine. (vi, 1887)                               | 94       |
| Production of Sulpho-Acids of. (P) Abel. From Limmer. (vii, 1888)                                                                                                                                                                                 | 840      | On the Weldon-Pechiney Chlorine Process. (vii, 1888)                                                         | 10       |
| Reaction in Analysis of Milk and Wine. (Herz.) (v, 1886)                                                                                                                                                                                          | 546      | On the Work of the Sections. (viii, 1889)                                                                    | 969      |
| Reaction in Milk Analysis. (Szilasi.) (v, 1886)                                                                                                                                                                                                   | 618      | On Wood as a Paper-making Agent. (v, 1886)                                                                   | 349      |
| Diphenyl-diisindole. (Möhlau.) (ii, 1883)                                                                                                                                                                                                         | 170      | Diseases of Wines. (Kausser.) (xiii, 1894)                                                                   | 750      |
| Diphenyl-diisindolazo Colours. (Möhlau.) (ii, 1883)                                                                                                                                                                                               | 171      | Dish for Photographic Development. (P) Rayner. (xii, 1893)                                                   | 290      |
| Diphenylethane, Derivatives of. (Heumann and Wiernik.) (vi, 1887)                                                                                                                                                                                 | 506      | Dishes containing Liquids, Apparatus for keeping in Motion. (P) Hunter. (x, 1891)                            | 1028     |
|                                                                                                                                                                                                                                                   |          | Photographic. (P) Norcombe. (x, 1891)                                                                        | 1028     |
|                                                                                                                                                                                                                                                   |          | Disinfectant, Petroleum as a Boiler, in Germany. (xii, 1893)                                                 | 739      |

| Apparatus for Liquid Hydrocarbons. (P) Dvorkovitz and others. (xi, 1892).....                                                                        | 152      |
| Apparatus for Sea Water. (P) Smillie. (xi, 1892).....                                                                                                | 896      |
| Apparatus for Spirits:                                                                                                                               |          |
| (P) Morris and Wethered. (xiv, 1895).....                                                                                                            | 378      |
| (P) Thompson. (x, 1891).....                                                                                                                         | 783      |
| (P) Vignier. (xiv, 1895).....                                                                                                                        | 765      |
| Apparatus for Water. (P) Nagel. (xiii, 1894).....                                                                                                    | 623      |
| Apparatus, Fractional. (Otto.) (xiii, 1894).....                                                                                                     | 837      |
| App. in Ammonia Soda Works. (Passbender.) (xii, 1893)...                                                                                             | 600      |
| Apparatus, Means for Regulating Liquor in. (P) Schwab. (x, 1891).....                                                                                | 626      |
| Apparatus, Portable. (P) Hood. (iv, 1885).....                                                                                                       | 133      |
| Apparatus, Vacuum. (P) Luck. (xi, 1892).....                                                                                                         | 143      |
| Conversion of Starch into Alcohol in Relation to. (Squire.) (iii, 1884).....                                                                         | 543      |
| Household Apparatus for. (P) John. (i, 1882).....                                                                                                    | 465      |
| Industry in Germany. (T.R.) (ix, 1890).....                                                                                                          | 674      |
| Preparation of Grain or Cereals for Use in. (P) Forded. (vi, 1887).....                                                                              | 145      |
| Process of. (P) Wright. (ix, 1886).....                                                                                                              | 331      |
| Refrigerator for Use in. (P) Worsam. (xiii, 1891).....                                                                                               | 269      |
| Distributor, Steam. (P) Henning. (ii, 1882).....                                                                                                     | 349      |
| Water, for Gas Scrubber. (P) Berlin Anhaltische Maschinenbau-Actien Gesellschaft. (ii, 1883).....                                                    | 263      |
| Disulpho Acid, Manufacture of Alpha-Naphthol, and Colouring Matters from. (P) Lake. From Leonhardt and Co. (viii, 1889).....                         | 770      |
| Disulphones, Treatment of, for Medicinal Purposes. (P) Lunan. (ix, 1890).....                                                                        | 1063     |
| Disulphonethylenediamides, Production of Aromatic. (P) Marckwald and Holtz. (xii, 1893).....                                                         | 545      |
| Disulphonic Acids, Influence of Radicles, Cl, OH, and NH <sub>2</sub> , on Formation of. (Armstrong and Wynne.) (ix, 1890)...                        | 862      |
| Acids, Preparation of Quinoline. (P) La Coste. (iv, 1885)...                                                                                         | 464      |
| Disulphonipiperazides, Production of Aromatic. (P) Marckwald and Holtz. (xii, 1893).....                                                             | 545      |
| Di-terebene, A. (Renard and Berthelot.) (vii, 1888).....                                                                                             | 115      |
| Dithionic Acid, Double Salt of. (Bodländer.) (ix, 1890).....                                                                                         | 1127     |
| Acid, Preparation of. (de la Harpe.) (iv, 1885).....                                                                                                 | 510      |
| Dithio-oxycarbon Acids, Production of Aromatic. (P) Baum. (ix, 1890).....                                                                            | 98       |
| Dithioisallylic Acid, Separation of the Isomeric Substances Produced in the Manufacture of. (P) Clark. From Von Heyden's Nachfolger. (ix, 1890)..... | 821      |
| Ditoly, Brominated Derivatives of. (Carnelley and Thomson.) (iv, 1885).....                                                                          | 669      |
| Ditolyamine, Para-, Nitro- and Amido- Derivatives of. (Jaubert.) (xiv, 1895).....                                                                    | 890      |
| Dittmar, Resolution of Condolence on death of Prof. (xi, 1892)...                                                                                    | 224      |
| Dividends, German Chemical. (T.R.) (xiv, 1895).....                                                                                                  | 403, 498 |
| Divider and Mixer for Ore Samples. (Bridgman.) (xi, 1892)...                                                                                         | 268      |
| Dixon's Paper on Action of Carbonic Oxide on Steam. (Armstrong.) (v, 1886).....                                                                      | 370      |
| "Doctor" for Printing Machines, An Aluminium Bronze. (xiii, 1894).....                                                                               | 388      |
| Doctors for Calico Printing. (P) Thomson. (x, 1891).....                                                                                             | 363      |
| For Printing Textile Fabrics. (P) Archer. (ix, 1890)...                                                                                              | 500      |
| Documents, Security of. (Jameson.) (iv, 1885).....                                                                                                   | 318      |
| Dolichos soja L. (Hosie.) (xii, 1893).....                                                                                                           | 769      |
| Dolomite, Diffusion of Zinc in. (Dieulauf.) (ii, 1883).....                                                                                          | 159      |
| Extracting Magnesia from Calced. (P) Closson. (i, 1882)...                                                                                           | 67       |
| Grouven's Furnace for Preparation of Carbonic Acid from. (Meyer-Mulsen.) (iii, 1884).....                                                            | 568      |
| Dolomitic Rocks, Manganese in. (ii, 1883).....                                                                                                       | 159      |
| Dominica, Drugs in. (T.R.) (vii, 1888).....                                                                                                          | 875      |
| Don Territory, Deposits of Coal, Salt, &c. in the. (T.R.) (vii, 1888).....                                                                           | 781      |
| Doona Zeylanica Thw., Resin of. (Valenta.) (x, 1891).....                                                                                            | 937      |
| Doors and Frames for Gas Retorts, Cooled. (P) Lürmann. (ii, 1883).....                                                                               | 344      |
| Dorsetshire Shale, Utilisation of. (x, 1891).....                                                                                                    | 630      |

| Blasting Compounds, Smokeless. (P) Moschek and Bruuner. (x, 1891).....                                          | 791      |
| Blasting, Directions for Use in. (T.R.) (viii, 1889).....                                                       | 581      |
| Blasting, Experiments with. (vii, 1888).....                                                                    | 342      |
| Blasting-Gelatin. (Hake.) (viii, 1889).....                                                                     | 322      |
| Blasting-Gelatin and other. (MacRoberts.) (ix, 1890).....                                                       | 476      |
| Blasting-Gelatin, Experiments to Demonstrate Safety of. (vii, 1888).....                                        | 489      |
| Blasting-Gelatin, Mannf. of. (MacRoberts.) (ix, 1890).....                                                      | 265      |
| Blasting-Gelatin, Treatment of. (P) Howett. (i, 1882).....                                                      | 425      |
| Blasting Material, Preparation of a. (P) Saulville and Lahant. (ii, 1883).....                                  | 296      |
| Blasting Materials, Manufacture of. (iv, 1885).....                                                             | 126      |
| Blasting, Method of Using for. (Laner.) (iii, 1884).....                                                        | 192      |
| Blasting Paper, Manufacture of. (P) Petry. (ii, 1883).....                                                      | 296      |
| Blasting Powder, Composition of. (P) Quinn. (i, 1882).....                                                      | 75       |
| Manufacture of:—                                                                                                |          |
| (P) Luck and Roberts. (iv, 1885).....                                                                           | 418      |
| (P) Espir. (iv, 1885).....                                                                                      | 417      |
| Blasting, New. (Himly.) (i, 1882).....                                                                          | 467      |
| Blasting, Preparation of, from Nitrated Cellulose. (P) Gedge. From Wolff and von Forster. (iv, 1885).....       | 243      |
| Blasting, with Gunccotton under Water. (P) von Forster. (ii, 1883).....                                         | 390      |
| Caps for Exploding Dynamite, Manufacture of. (P) Paulus. (iv, 1885).....                                        | 754      |
| Caps or Detonators for Dynamite. (P) Johnston and Smith. (vi, 1887).....                                        | 226      |
| Carbo-Dynamite. (vii, 1888).....                                                                                | 401      |
| (Hake.) (viii, 1889).....                                                                                       | 522      |
| Cellulose, Preparation of Blasting Powder from Nitrated. (P) Gedge. From Wolff and von Forster. (iv, 1885)..... | 243, 418 |
| Chronograph for Timing. (Le Boulenger.) (vii, 1884).....                                                        | 60       |
| Combustion of Ballistic. (Vieille.) (xii, 1894).....                                                            | 659      |
| Cresylic Acid and Allied Products. (Allen.) (ix, 1890).....                                                     | 141      |
| Cresylic Acid. (Cresol.) (vii, 1888).....                                                                       | 866      |
| Dangers in Manufacture of. (Guttman.) (xi, 1892).....                                                           | 203      |
| Detonating Point of Determination of. (Bein.) (ix, 1890).....                                                   | 214      |
| Detonator, Composition for Use as a. (P) Ward and Gregory. (ix, 1890).....                                      | 893      |
| Detonators for Dynamite. (P) Johnson and Smith. (vi, 1887).....                                                 | 226      |
| Detonators, Manufacture of. (P) Newton. From Nobel. (vii, 1888).....                                            | 867      |
| Detonators, Railway Fog Signal. (P) Ruston and Beadle. (xi, 1892).....                                          | 257      |
| Dynamite:—                                                                                                      |          |

|                                                                                       |          |
|---------------------------------------------------------------------------------------|----------|
| For Caustic Soda Solution. (P) Thompson. From Solvay. (v, 1886).....                  | 424      |
| For Chemical Works. (T.R.) (xii, 1893).....                                           | 962      |
| For Liquids. (P) Powis and Ellis. (xiv, 1895).....                                    | 469      |
| For Oil. (P) Brooks. (xiv, 1895).....                                                 | 1050     |
| For Saccharine Juices, &c. (P) Abel. From Perret. (iii, 1881).....                    | 375      |
| For Saccharine Solutions. (P) Newlands and Allott. (viii, 1889).....                  | 128      |
| For Sewage, &c. (P) Ramsbottom. (xiv, 1895).....                                      | 177      |
| For Sugar Liquors. (P) Lake. From Mathieson. (v, 1886).....                           | 330, 330 |
| For Water. (P) Johnson. (v, 1886).....                                                | 245      |
| For Water and other Liquids. (P) Jackson. (iv, 1885).....                             | 134      |
| For Water and Sewage. (P) Candy. (xiii, 1894).....                                    | 169      |
| High Pressure. (P) Fulda. (ii, 1883).....                                             | 126      |
| Making Sterilised. (P) Brandenburg and Pott. (xiv, 1895).....                         | 502      |
| Microbes in. (Mendes.) (iv, 1885).....                                                | 606      |
| Of Calcined Earth. (Nordtmeyer.) (x, 1891).....                                       | 720      |
| Passage of Bacteria through Cloth used for Air. (Möller.) (ix, 1890).....             | 643      |
| Pressure. (P) Oxley and Sellars. (x, 1891).....                                       | 750      |
| Substitute for Pottery for. (P) Merin. (xi, 1892).....                                | 1007     |
| Use of Porous Earthenware, in Laboratories. (Pukall.) (xii, 1893).....                | 623      |
| Used in Manufacture of Oils, Greases, Alcohols, &c. (P) Iseli. (xiii, 1894).....      | 377      |
| Wanted in the United States. (T.R.) (vi, 1887).....                                   | 684      |
| Filter-Press. (P) Koellner. (vi, 1887).....                                           | 814      |
| And Montejus combined. (P) Fletcher. (iv, 1885).....                                  | 105      |
| Cloth for Slip. (P) Lucas. (xi, 1892).....                                            | 908      |
| Cloths. (P) Droop. (x, 1891).....                                                     | 991      |
| Construction of Laboratory. (Kempel.) (iv, 1885).....                                 | 612      |
| Plates:                                                                               |          |
| (P) Capillary. (x, 1891).....                                                         | 239      |
| (P) Strype. (i, 1882).....                                                            | 459      |
| Potter's. (P) Critchlow and Forrester. (vi, 1887).....                                | 510      |
| Sheets, Manufacture of Cloth for. (P) Amitage and Sons and Dunkerley. (xi, 1892)..... | 908      |
| Used for Thick Sugar Liquors, Deposit on. (vii, 1888).....                            | 223      |
| Filter-Presses:                                                                       |          |
| (P) Allott and Paton. (vi, 1887).....                                                 | 537      |
| (P) Anderson. (vi, 1887).....                                                         | 501      |
| (P) Brook and Minton. (vii, 1888), 313; (x, 1891).....                                | 127      |
| (P) Brunswick Engineering Works. (i, 1882).....                                       | 177      |
| (P) Clark. (vi, 1887).....                                                            | 812      |
| (P) Clark and Fookes. (v, 1886).....                                                  | 444      |
| (P) Cowper. (vii, 1887), 812; (vii, 1888).....                                        | 313      |
| (P) Critchlow. (xiii, 1894).....                                                      | 929      |
| (P) Critchlow and Forrester. (vi, 1887).....                                          | 813      |
| (P) Dehne. (xiv, 1895).....                                                           | 854      |
| (P) Dehne and Harzer. (xiv, 1895).....                                                | 134      |
| (P) Downing. From The Maschinenbau Aktien-gesellschaft. (xiv, 1895).....              | 951      |
| (P) Drake. (viii, 1889).....                                                          | 449      |
| (P) Drake and Muirhead. (v, 1886), 415; (viii, 1889).....                             | 186      |
| (P) Euzinger. (vii, 1888).....                                                        | 313      |
| (P) Gismondini. (vii, 1888).....                                                      | 834      |
| (P) Hill. (ix, 1890).....                                                             | 481      |
| (P) Johnson. (i, 1882).....                                                           | 439      |
